Blynt — Complete 100 QA Test Cases Specification

Exhaustive QA Test Gate Flowcharts & Assertion Verifications Across All 100 System Scenarios

Master Quality Assurance Overview: This document defines the comprehensive test gate catalog for automated, manual, and statutory verification across the Blynt platform. Every single test case features an individual architectural flowchart illustrating the sequential validation gates: descending through input schema validation, security token authentication, multi-tenant boundaries, and general ledger invariants, with pass (green) and fail (red) assertion targets.

TC-001: Standard Email & Password Login

Category: Authentication & Sessions | **Tester Role:** Any Registered User | **Expected Rejection:** ASSERT 401 INVALID_CREDENTIALS

Prerequisites: User exists with active status

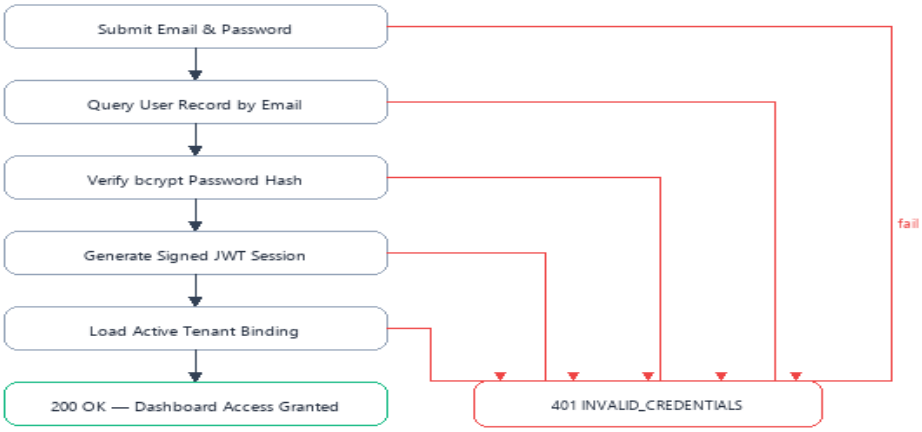

Figure 001 — Standard Email & Password Login Flow Architecture

Acceptance Standard: Assert bcrypt hash comparison passes and returns JWT access token.

TC-002: Multi-Tenant Workspace Context Switching

Category: Authentication & Sessions | **Tester Role:** Business Owner / Multi-Org User | **Expected Rejection:** ASSERT 403 TENANT_MEMBERSHIP_REQUIRED

Prerequisites: User belongs to at least 2 distinct organizations

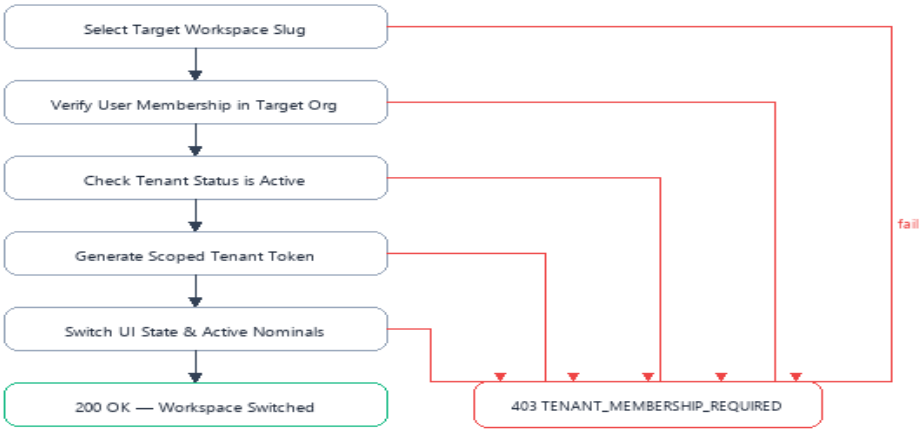

Figure 002 — Multi-Tenant Workspace Context Switching Flow Architecture

Acceptance Standard: Assert user can only switch to organizations where active membership exists.

TC-003: Session Token Expiry & Silent Refresh

Category: Authentication & Sessions | **Tester Role:** Active Logged-in User | **Expected Rejection:** ASSERT 401 REFRESH_TOKEN_EXPIRED

Prerequisites: Access token expired; valid refresh token in httpOnly cookie

Figure 003 — Session Token Expiry & Silent Refresh Flow Architecture

Acceptance Standard: Assert refresh token rotates seamlessly without forcing manual re-login.

TC-004: Cross-Tenant Injection Prevention Guard

Category: Multi-Tenant Security | **Tester Role:** Malicious Actor / External User | **Expected Rejection:** ASSERT 403 TENANT_MISMATCH

Prerequisites: Attacker attempts to query another tenant's resourceId

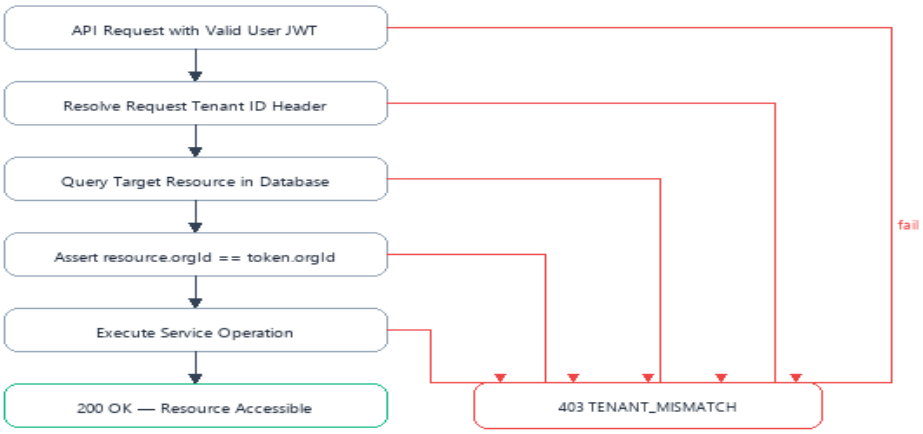

Figure 004 — Cross-Tenant Injection Prevention Guard Flow Architecture

Acceptance Standard: Assert cross-tenant data requests are blocked at controller guard level.

TC-005: Two-Factor Authentication (2FA) TOTP Verification

Category: Security & Access | **Tester Role:** User with 2FA Enabled | **Expected Rejection:** ASSERT 401 INVALID_TOTP_CODE

Prerequisites: Primary credentials verified; TOTP code submitted

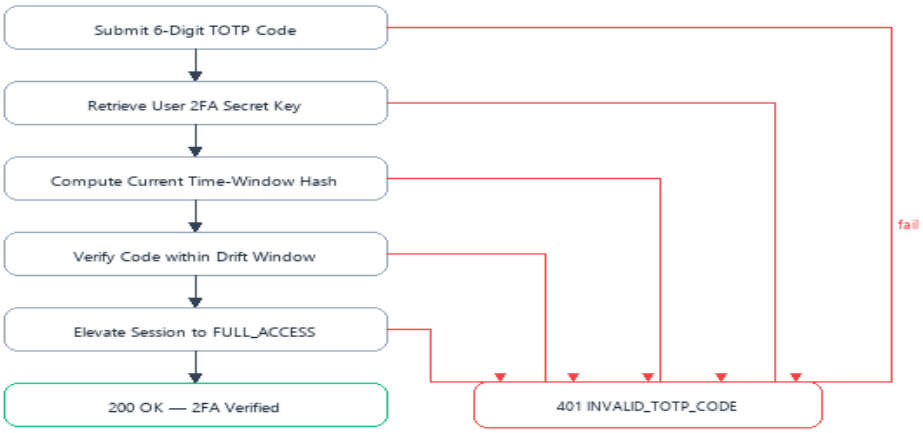

Figure 005 — Two-Factor Authentication (2FA) TOTP Verification Flow Architecture

Acceptance Standard: Assert session remains RESTRICTED until valid TOTP code is confirmed.

TC-006: Password Reset via Time-Limited Token

Category: Security & Access | **Tester Role:** User Forgot Password | **Expected Rejection:** ASSERT 400 EXPIRED_RESET_TOKEN

Prerequisites: Valid registered email address provided

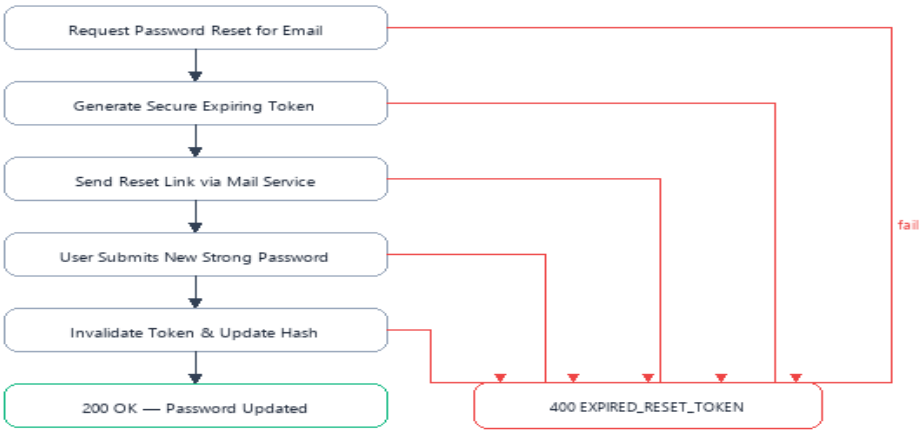

Figure 006 — Password Reset via Time-Limited Token Flow Architecture

Acceptance Standard: Assert reset tokens expire after 60 minutes and cannot be reused.

TC-007: Brute-Force Login Rate Limiting Defense

Category: Security & Access | **Tester Role:** External Client IP | **Expected Rejection:** ASSERT 429 TOO_MANY_REQUESTS

Prerequisites: Target endpoint receives rapid successive requests

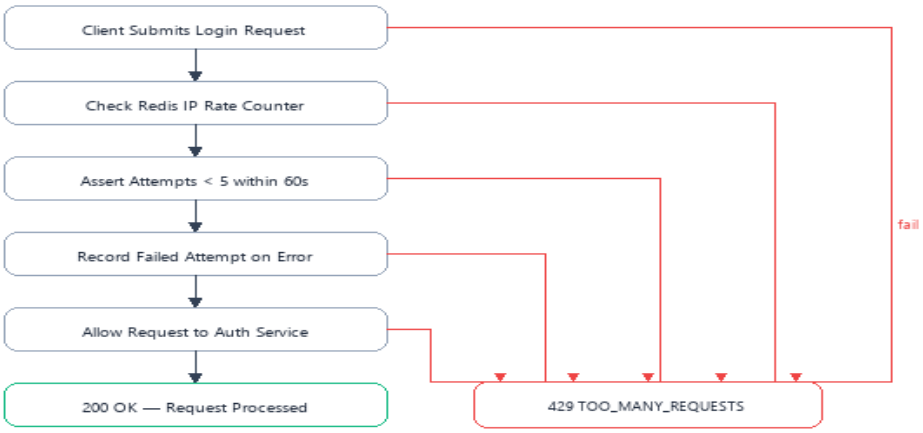

Figure 007 — Brute-Force Login Rate Limiting Defense Flow Architecture

Acceptance Standard: Assert IP is throttled for 15 minutes after 5 consecutive failed attempts.

TC-008: Platform Super Admin Portal Gate

Category: Governance & Security | **Tester Role:** Platform Support Operator | **Expected Rejection:** ASSERT 403 SUPER_ADMIN_REQUIRED

Prerequisites: Super admin portal accessed at /admin

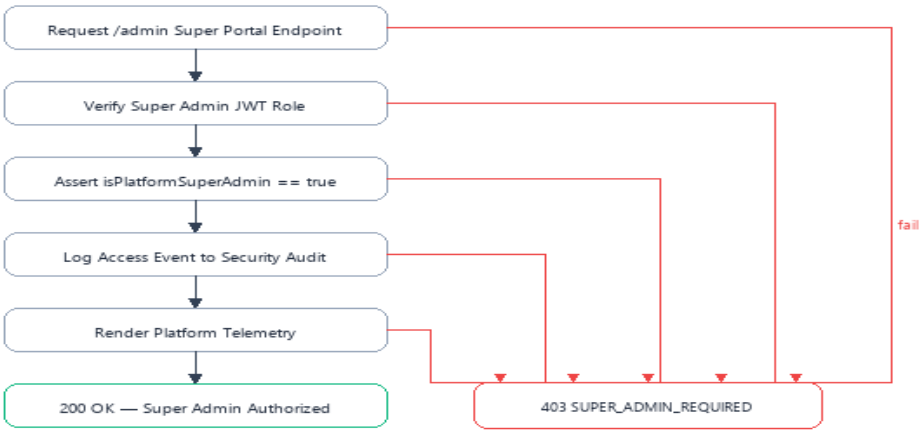

Figure 008 — Platform Super Admin Portal Gate Flow Architecture

Acceptance Standard: Assert regular tenant owners receive HTTP 403 when requesting /admin.

TC-009: User Logout & Complete Session Revocation

Category: Security & Access | **Tester Role:** Authenticated User | **Expected Rejection:** ASSERT 401 SESSION_TERMINATED

Prerequisites: Active authenticated session exists

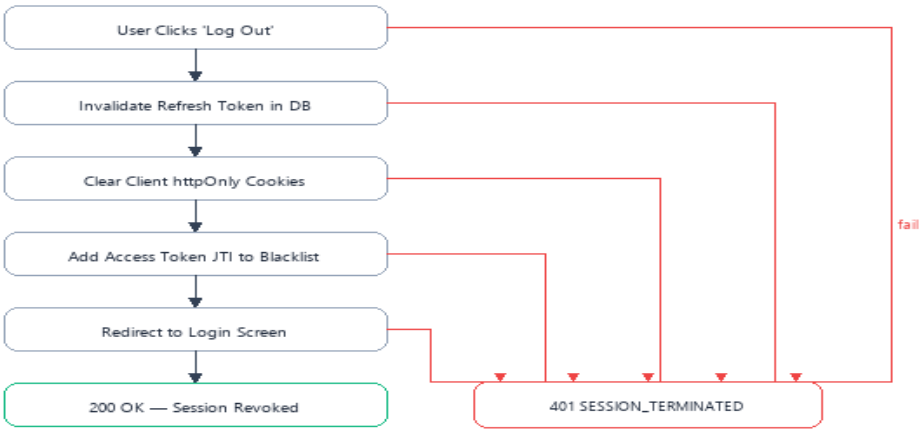

Figure 009 — User Logout & Complete Session Revocation Flow Architecture

Acceptance Standard: Assert blacklisted session token cannot be reused after logout.

TC-010: Employee Organization Invitation & Onboarding

Category: Tenancy & Users | **Tester Role:** Business Owner / Admin | **Expected Rejection:** ASSERT 409 USER_ALREADY_MEMBER

Prerequisites: Inviting owner has ADMIN permissions

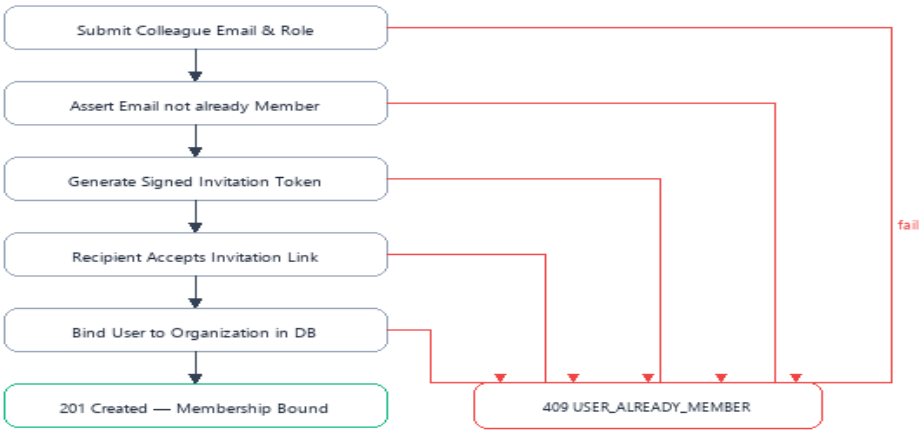

Figure 010 — Employee Organization Invitation & Onboarding Flow Architecture

Acceptance Standard: Assert duplicate invitations to existing members are rejected.

TC-011: Organization Legal Entity Creation

Category: Organization Setup | **Tester Role:** New Business Owner | **Expected Rejection:** ASSERT 400 INVALID_ORG_PAYLOAD

Prerequisites: User is authenticated; no org created yet

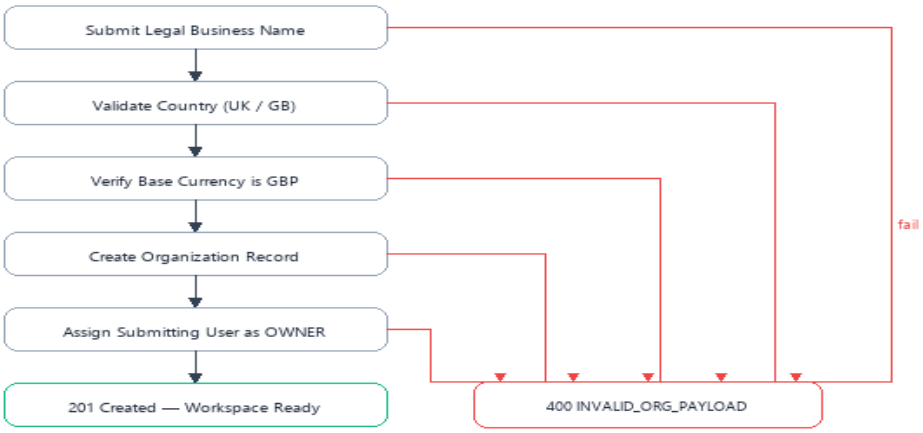

Figure 011 — Organization Legal Entity Creation Flow Architecture

Acceptance Standard: Assert new entity is provisioned with OWNER membership automatically.

TC-012: Unique Organization URL Slug Allocation

Category: Organization Setup | **Tester Role:** Business Owner | **Expected Rejection:** ASSERT 409 SLUG_ALREADY_EXISTS

Prerequisites: Legal business name submitted

Figure 012 — Unique Organization URL Slug Allocation Flow Architecture

Acceptance Standard: Assert slug uniqueness across the entire multi-tenant platform.

TC-013: HMRC UK VAT Registration Number Validation

Category: Statutory Configuration | **Tester Role:** Bookkeeper / Accountant | **Expected Rejection:** ASSERT 400 INVALID_VAT_FORMAT

Prerequisites: Organization registered for UK VAT

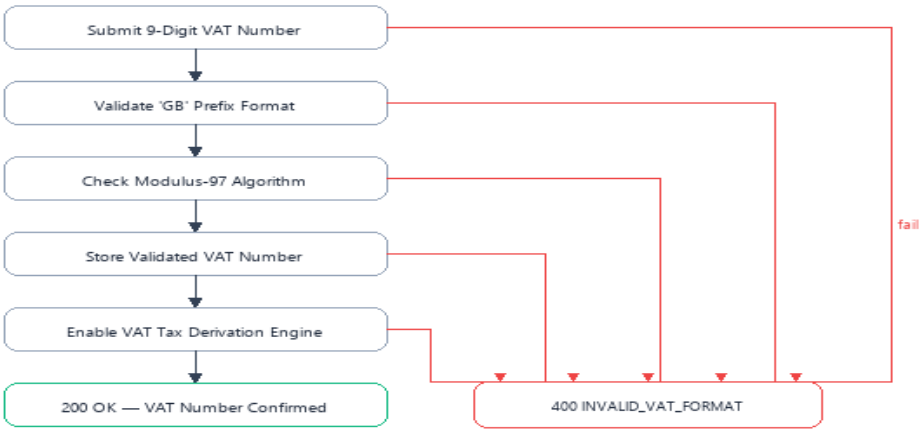

Figure 013 — HMRC UK VAT Registration Number Validation Flow Architecture

Acceptance Standard: Assert malformed or unverified VAT numbers are rejected at entry.

TC-014: UK Companies House Registration Number Validation

Category: Statutory Configuration | **Tester Role:** Business Owner | **Expected Rejection:** ASSERT 400 INVALID_COMPANY_NUMBER

Prerequisites: Registered UK limited company

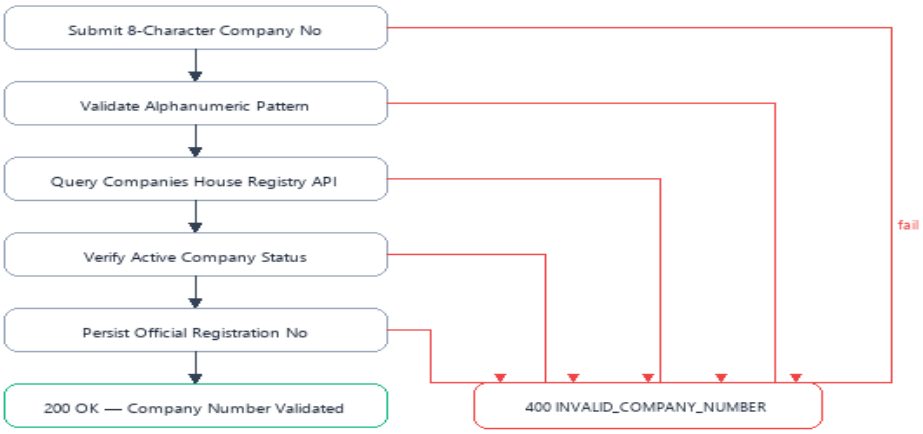

Figure 014 — UK Companies House Registration Number Validation Flow Architecture

Acceptance Standard: Assert company registration number conforms to UK standard format.

TC-015: Base Trading Currency Lock (GBP)

Category: Multi-Currency Governance | **Tester Role:** Business Owner | **Expected Rejection:** ASSERT 422 BASE_CURRENCY_LOCKED

Prerequisites: New organization initialized

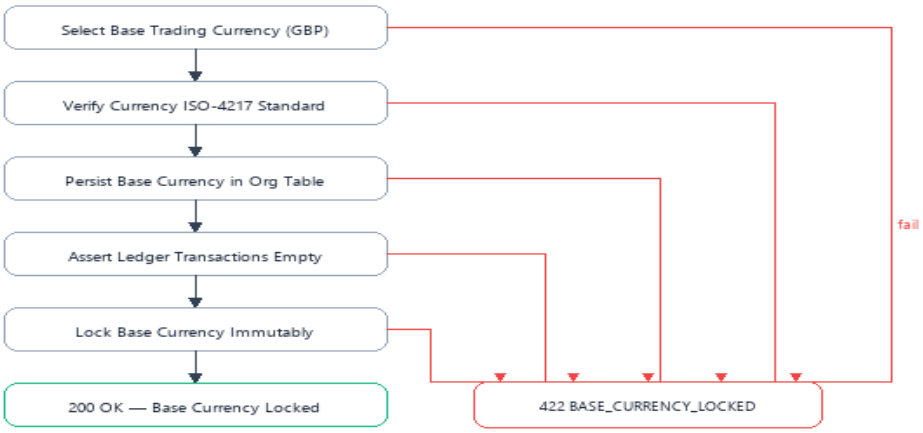

Figure 015 — Base Trading Currency Lock (GBP) Flow Architecture

Acceptance Standard: Assert base currency cannot be modified after initial ledger entries.

TC-016: Financial Year Calendar Setup & Partitioning

Category: Accounting Foundations | **Tester Role:** Accountant / Owner | **Expected Rejection:** ASSERT 400 INVALID_DATE_RANGE

Prerequisites: Organization created; setting accounting dates

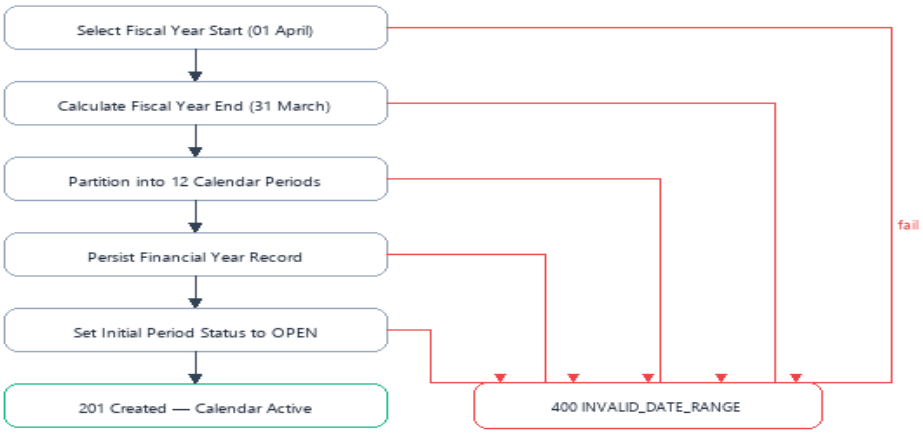

Figure 016 — Financial Year Calendar Setup & Partitioning Flow Architecture

Acceptance Standard: Assert financial year spans exactly 12 contiguous accounting periods.

TC-017: Company Branding & Invoice Logo Upload

Category: Branding & Customization | **Tester Role:** Business Owner / Clerk | **Expected Rejection:** ASSERT 400 FILE_TOO_LARGE_OR_INVALID

Prerequisites: Organization workspace active

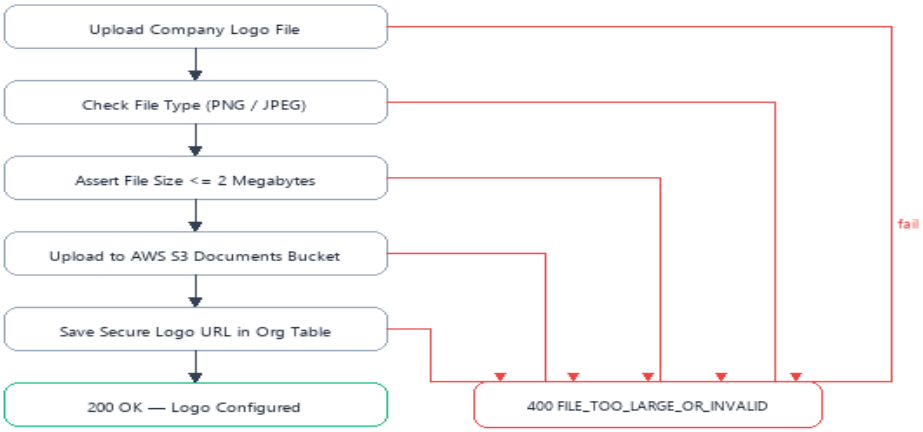

Figure 017 — Company Branding & Invoice Logo Upload Flow Architecture

Acceptance Standard: Assert non-image files or oversized uploads are rejected before upload.

TC-018: Organization Soft Deactivation & Archive

Category: Tenancy Governance | **Tester Role:** Business Owner | **Expected Rejection:** ASSERT 403 OWNER_ROLE_REQUIRED

Prerequisites: Business ceases trading or migrates

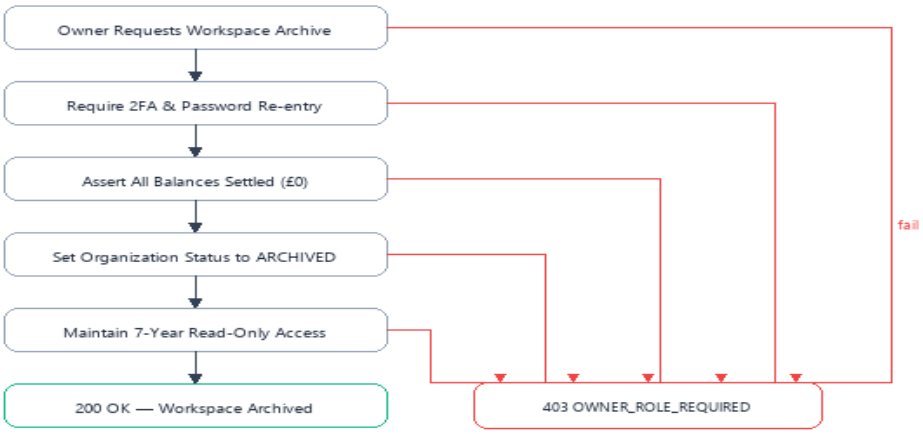

Figure 018 — Organization Soft Deactivation & Archive Flow Architecture

Acceptance Standard: Assert non-owners cannot archive organizations; records preserved for audit.

TC-019: Standard Nominal Code Creation (1000-9999)

Category: General Ledger | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 INVALID_CODE_FORMAT

Prerequisites: Chart of Accounts active

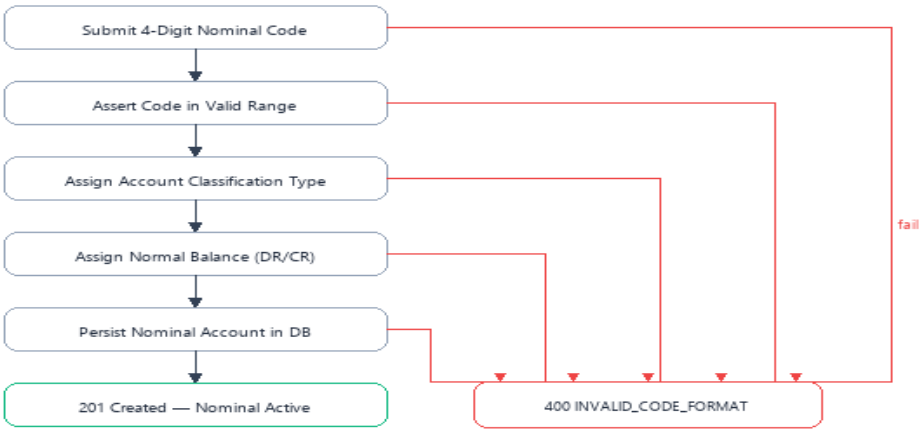

Figure 019 — Standard Nominal Code Creation (1000-9999) Flow Architecture

Acceptance Standard: Assert nominal codes conform strictly to UK 4-digit standard ranges.

TC-020: Duplicate Nominal Code Constraint Check

Category: General Ledger | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 409 DUPLICATE_ACCOUNT_CODE

Prerequisites: Adding new account to COA

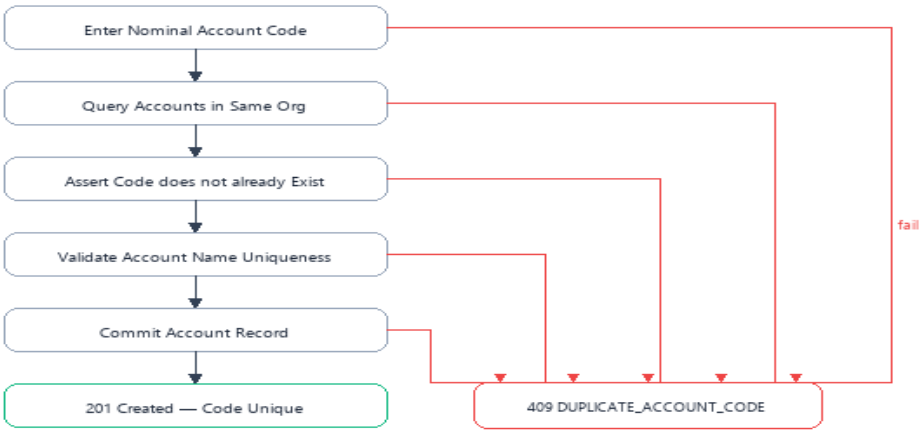

Figure 020 — Duplicate Nominal Code Constraint Check Flow Architecture

Acceptance Standard: Assert duplicate codes within the same organization are rejected.

TC-021: Accounts Receivable Control Account Protection

Category: Ledger Governance | **Tester Role:** Bookkeeper / Clerk | **Expected Rejection:** ASSERT 422 AR_CONTROL_PROTECTED

Prerequisites: Attempting manual journal to Code 1100

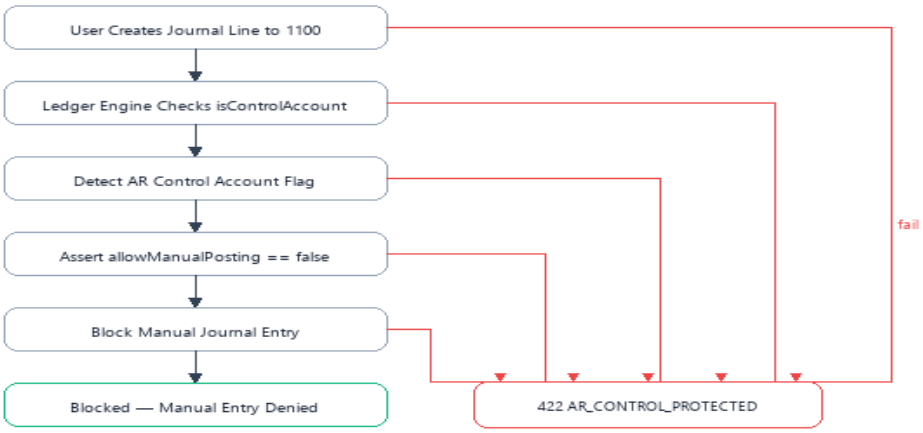

Figure 021 — Accounts Receivable Control Account Protection Flow Architecture

Acceptance Standard: Assert direct journals to Accounts Receivable are physically blocked.

TC-022: Accounts Payable Control Account Protection

Category: Ledger Governance | **Tester Role:** Bookkeeper / Clerk | **Expected Rejection:** ASSERT 422 AP_CONTROL_PROTECTED

Prerequisites: Attempting manual journal to Code 2100

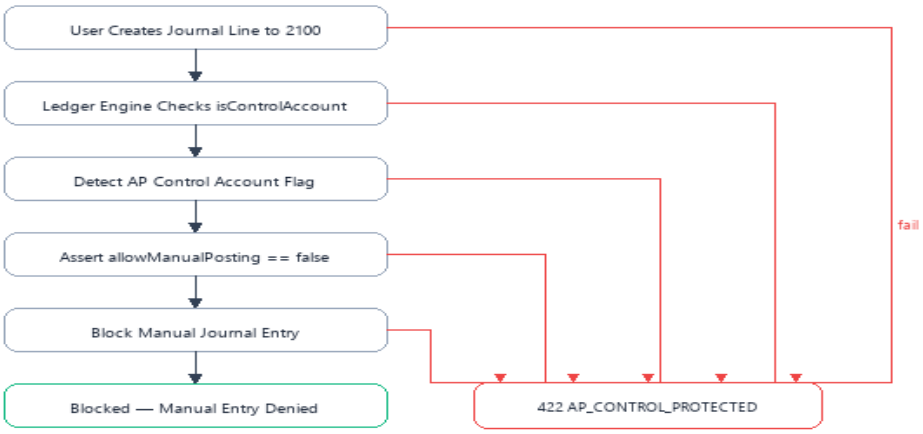

Figure 022 — Accounts Payable Control Account Protection Flow Architecture

Acceptance Standard: Assert direct journals to Accounts Payable are physically blocked.

TC-023: VAT Control Account Automated Posting Rule

Category: Tax Governance | **Tester Role:** Any User | **Expected Rejection:** ASSERT 422 VAT_CONTROL_PROTECTED

Prerequisites: Attempting manual journal to Code 2200

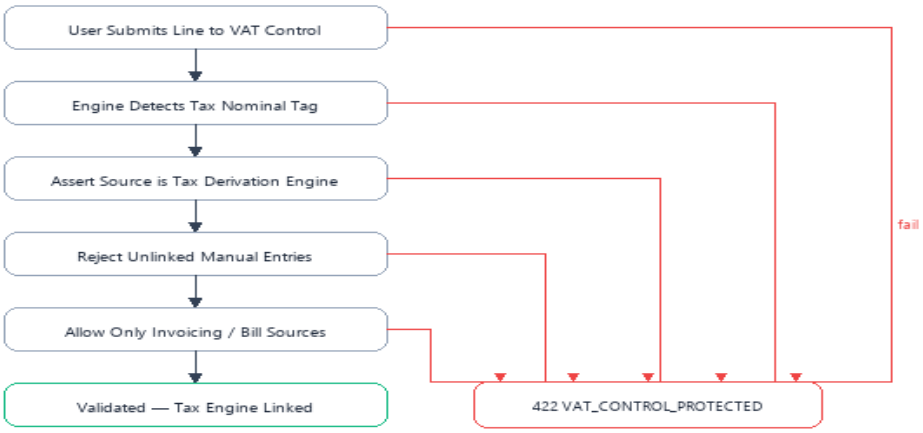

Figure 023 — VAT Control Account Automated Posting Rule Flow Architecture

Acceptance Standard: Assert VAT control nominals can only be credited/debited by tax engine.

TC-024: Retained Earnings System Account Lock

Category: Ledger Governance | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 422 RETAINED_EARNINGS_LOCKED

Prerequisites: Attempting edit on Code 3100

Figure 024 — Retained Earnings System Account Lock Flow Architecture

Acceptance Standard: Assert Retained Earnings account is reserved exclusively for year-end closing.

TC-025: Account Normal Balance Derivation Rule

Category: Accounting Invariants | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 INVALID_NORMAL_BALANCE

Prerequisites: Creating nominal account

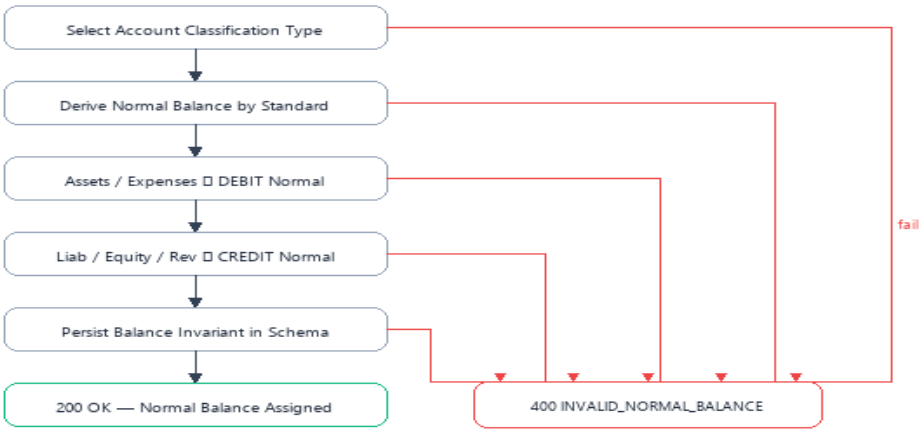

Figure 025 — Account Normal Balance Derivation Rule Flow Architecture

Acceptance Standard: Assert normal balance aligns with double-entry accounting fundamentals.

TC-026: Parent-Child Nominal Account Hierarchy

Category: Chart of Accounts | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 404 PARENT_NOT_FOUND

Prerequisites: Creating sub-nominal account

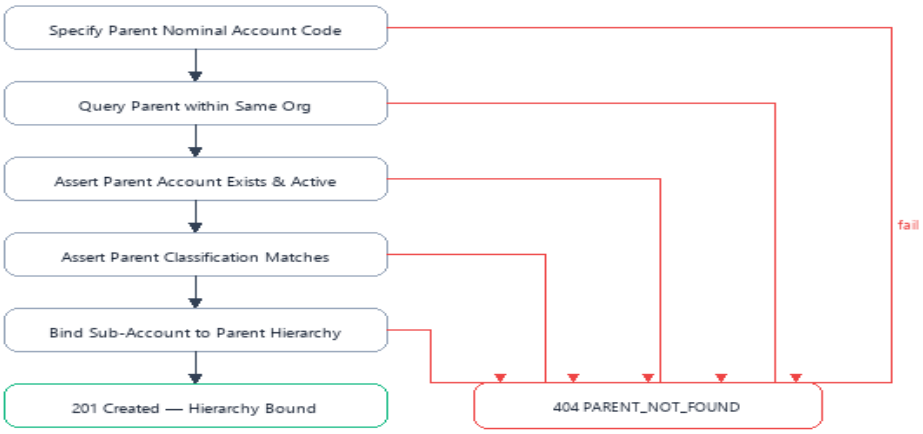

Figure 026 — Parent-Child Nominal Account Hierarchy Flow Architecture

Acceptance Standard: Assert sub-accounts must share classification and tenant with parent.

TC-027: Account Deactivation with Zero Balance Check

Category: Chart of Accounts | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 422 ACCOUNT_BALANCE_NON_ZERO

Prerequisites: Deactivating obsolete nominal code

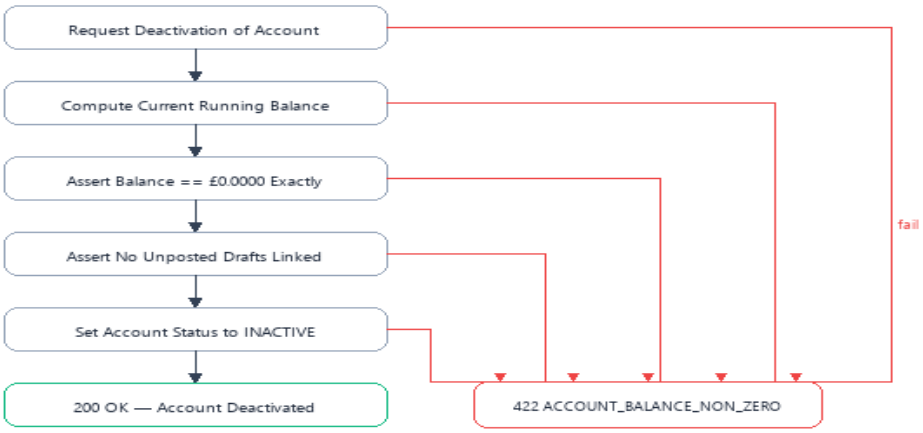

Figure 027 — Account Deactivation with Zero Balance Check Flow Architecture

Acceptance Standard: Assert accounts with active balances cannot be deactivated.

TC-028: Account Foreign Currency Assignment Check

Category: Multi-Currency | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 UNSUPPORTED_CURRENCY

Prerequisites: Creating foreign currency bank/subledger

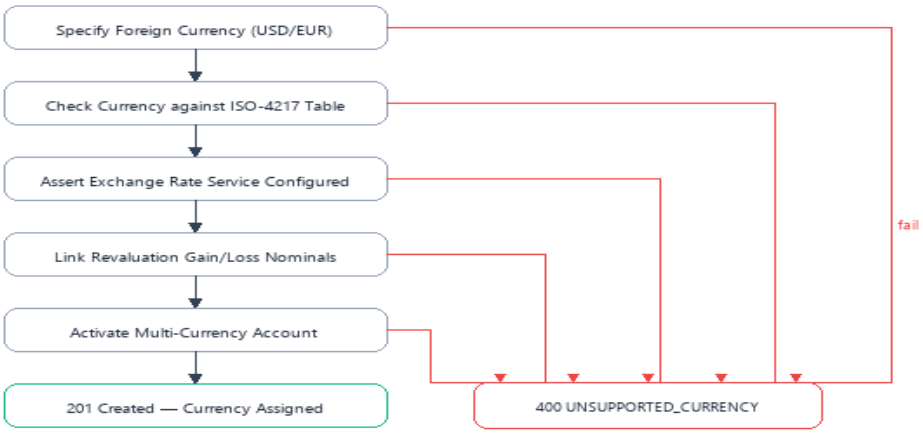

Figure 028 — Account Foreign Currency Assignment Check Flow Architecture

Acceptance Standard: Assert non-standard currency codes are rejected.

TC-029: Draft Journal Entry Creation & Line Staging

Category: Journal Lifecycle | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 EMPTY_JOURNAL_PAYLOAD

Prerequisites: Chart of accounts active; user has write permission

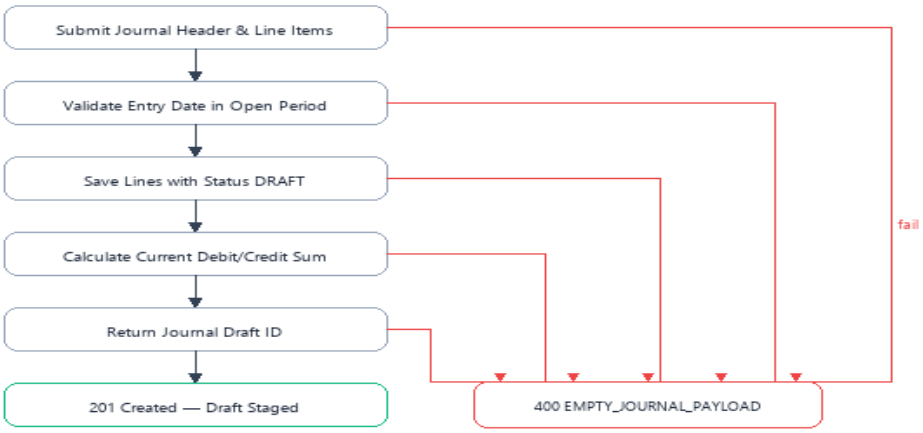

Figure 029 — Draft Journal Entry Creation & Line Staging Flow Architecture

Acceptance Standard: Assert draft journals do not alter general ledger running balances.

TC-030: Debits Equal Credits Equilibrium Invariant

Category: Accounting Invariants | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 422 JOURNAL_UNBALANCED

Prerequisites: Attempting to post journal entry

Figure 030 — Debits Equal Credits Equilibrium Invariant Flow Architecture

Acceptance Standard: Assert unbalanced journals are physically rejected by database constraints.

TC-031: Minimum Two Line Items Enforcement

Category: Accounting Invariants | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 MINIMUM_LINES_REQUIRED

Prerequisites: Attempting to post journal

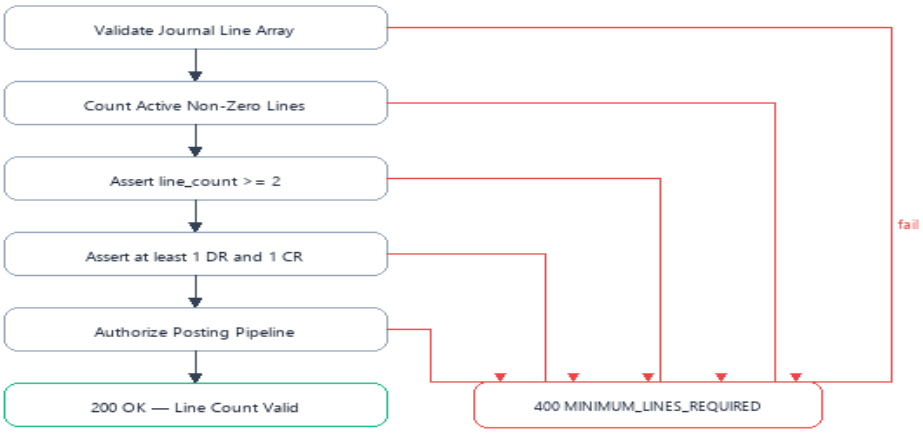

Figure 031 — Minimum Two Line Items Enforcement Flow Architecture

Acceptance Standard: Assert single-line transactions are rejected before ledger commit.

TC-032: Zero Amount Line Item Rejection

Category: Journal Validation | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 ZERO_AMOUNT_REJECTED

Prerequisites: Entering journal lines

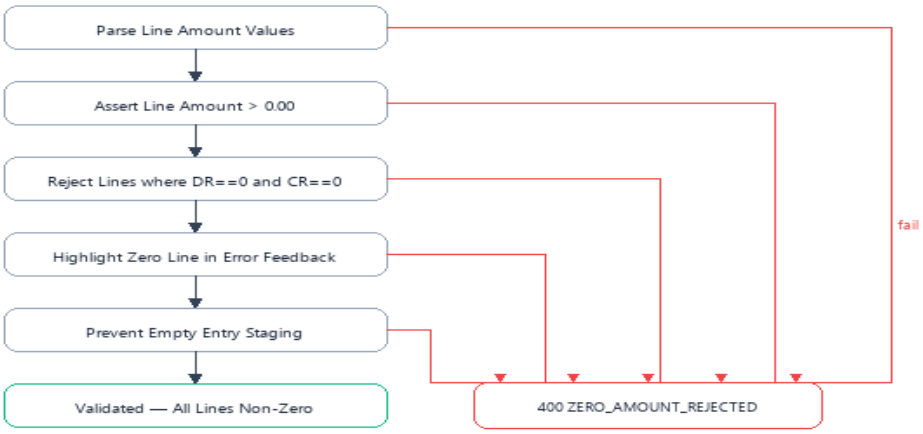

Figure 032 — Zero Amount Line Item Rejection Flow Architecture

Acceptance Standard: Assert lines with zero values are flagged and blocked.

TC-033: Mutually Exclusive Line Amounts (DR vs CR)

Category: Journal Validation | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 MUTUALLY_EXCLUSIVE_LINE

Prerequisites: Entering line values

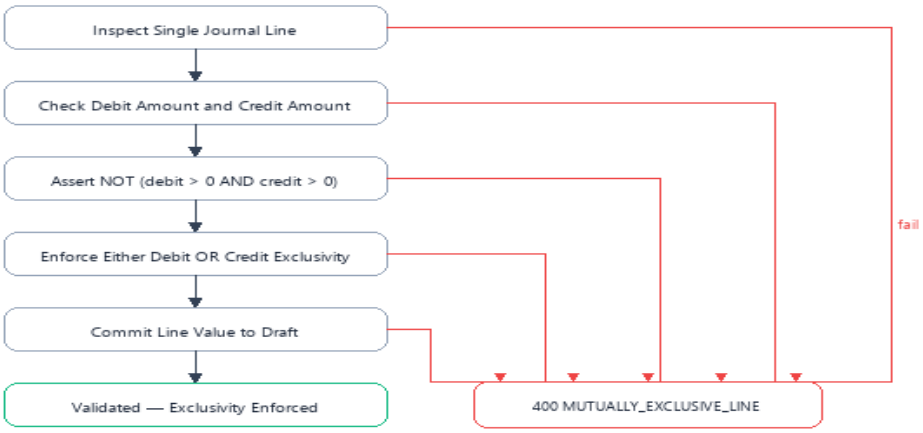

Figure 033 — Mutually Exclusive Line Amounts (DR vs CR) Flow Architecture

Acceptance Standard: Assert a single line cannot specify both debit and credit amounts.

TC-034: Arbitrary Decimal Precision Arithmetic Check

Category: Accounting Precision | **Tester Role:** System Math Engine | **Expected Rejection:** ASSERT 422 PRECISION_ROUNDING_ERR

Prerequisites: Computing tax and currency fractions

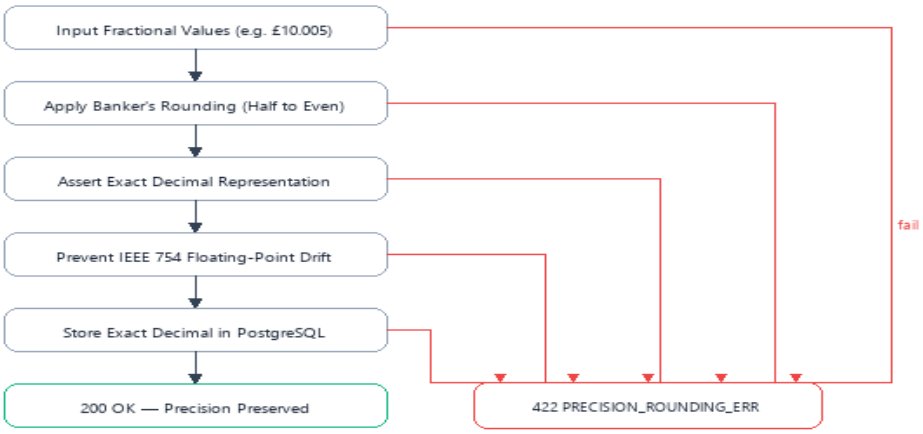

Figure 034 — Arbitrary Decimal Precision Arithmetic Check Flow Architecture

Acceptance Standard: Assert floating-point rounding errors never enter general ledger balances.

TC-035: Atomic Multi-Line Ledger Commit Transaction

Category: Ledger Engine | **Tester Role:** Posting Engine | **Expected Rejection:** ASSERT 500 ATOMIC_POST_FAILED

Prerequisites: Validated balanced journal ready to post

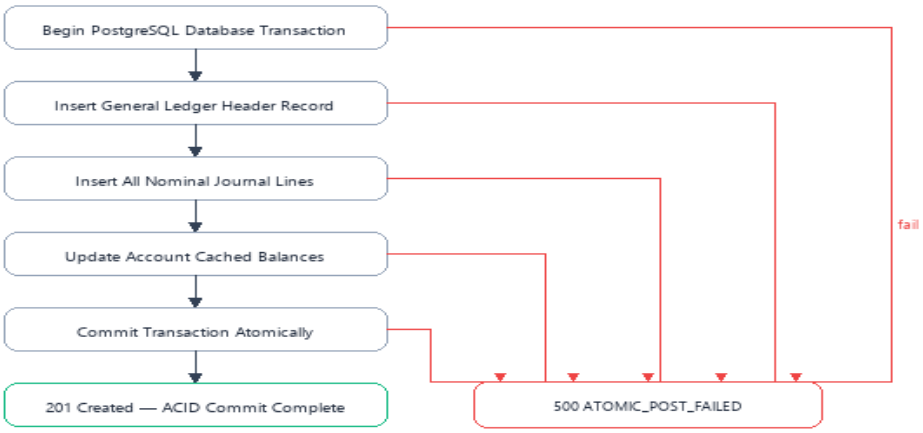

Figure 035 — Atomic Multi-Line Ledger Commit Transaction Flow Architecture

Acceptance Standard: Assert failure on any single line causes complete database rollback.

TC-036: Posted Journal Historical Immutability

Category: Ledger Immutability | **Tester Role:** Any User | **Expected Rejection:** ASSERT 403 POSTED_JOURNAL_IMMUTABLE

Prerequisites: Journal has status POSTED

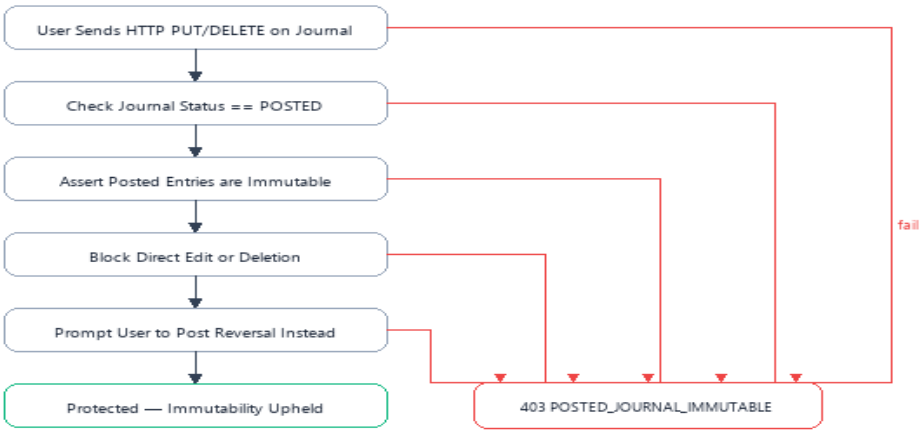

Figure 036 — Posted Journal Historical Immutability Flow Architecture

Acceptance Standard: Assert posted accounting transactions can never be modified or erased.

TC-037: Symmetrical GAAP Journal Reversal Linking

Category: Journal Reversals | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 409 ALREADY_REVERSED

Prerequisites: Posted journal requires correction

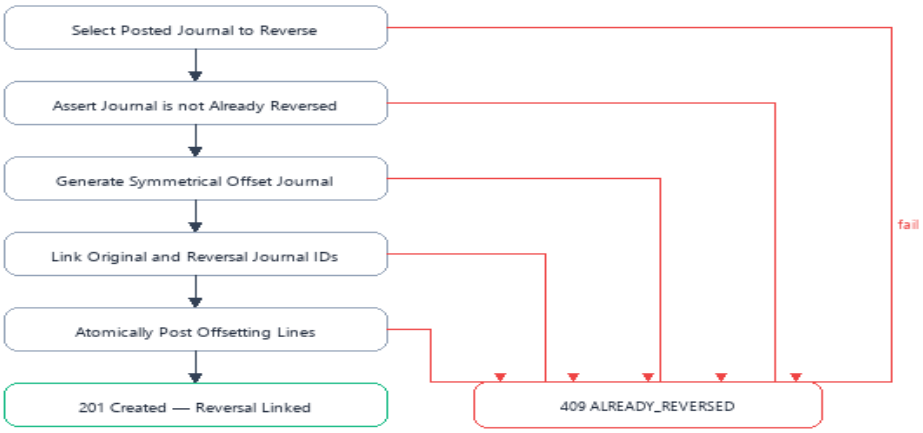

Figure 037 — Symmetrical GAAP Journal Reversal Linking Flow Architecture

Acceptance Standard: Assert reversal creates an exact mirrored transaction preserving audit trails.

TC-038: Draft Journal Clean Discard & Garbage Collection

Category: Journal Lifecycle | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 403 CANNOT_DELETE_POSTED

Prerequisites: Draft journal no longer needed

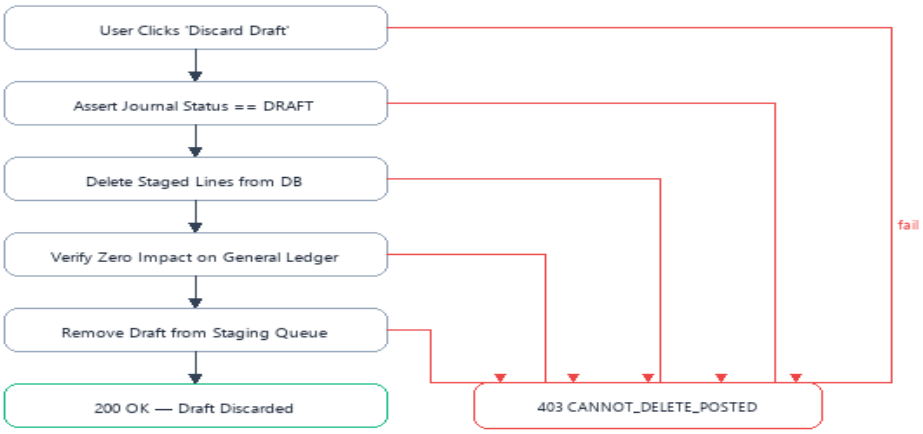

Figure 038 — Draft Journal Clean Discard & Garbage Collection Flow Architecture

Acceptance Standard: Assert draft journals can be safely deleted without ledger distortion.

TC-039: Customer Contact Profile Creation & Verification

Category: Commercial Subledgers | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 400 INVALID_CONTACT_DATA

Prerequisites: Adding new client to system

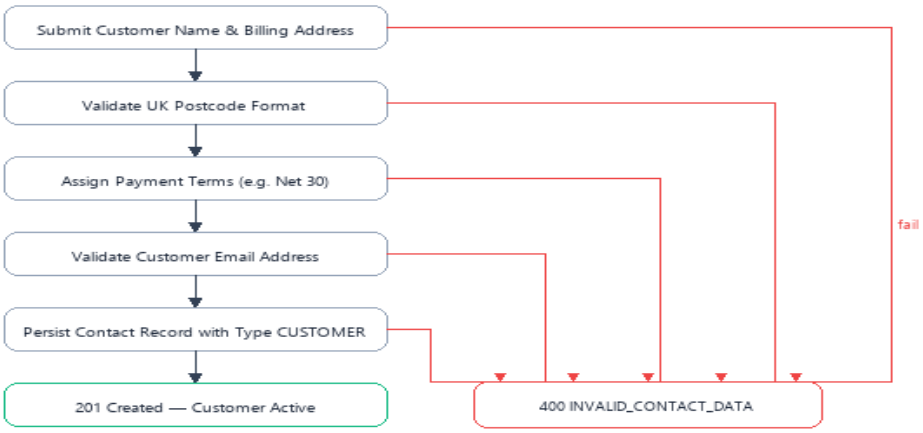

Figure 039 — Customer Contact Profile Creation & Verification Flow Architecture

Acceptance Standard: Assert customer contact records validate address and billing terms.

TC-040: Sales Invoice Draft Generation

Category: Sales & Billing | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 404 CUSTOMER_NOT_FOUND

Prerequisites: Active customer exists

Figure 040 — Sales Invoice Draft Generation Flow Architecture

Acceptance Standard: Assert invoice numbers increment monotonically with zero duplicates.

TC-041: UK Standard 20% VAT Line Derivation

Category: Tax Calculation | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 400 INVALID_TAX_CALCULATION

Prerequisites: Item subject to standard UK VAT

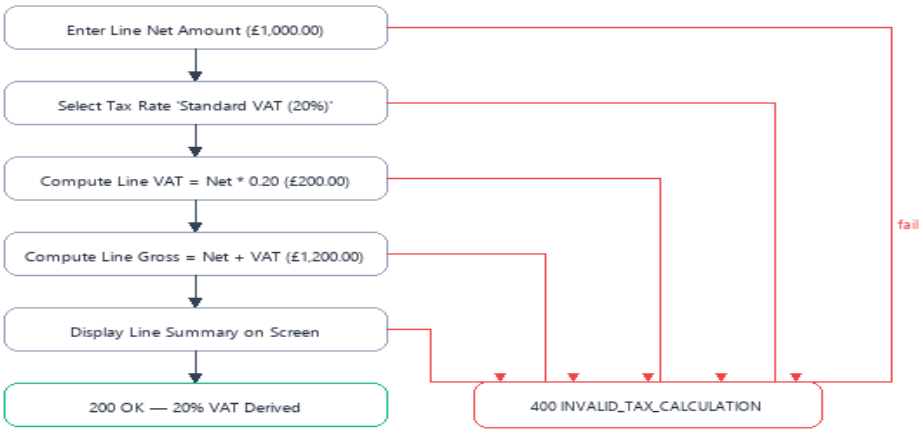

Figure 041 — UK Standard 20% VAT Line Derivation Flow Architecture

Acceptance Standard: Assert VAT standard rate applies exact 20% math with decimal accuracy.

TC-042: UK Reduced 5% VAT Line Derivation

Category: Tax Calculation | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 400 INVALID_TAX_RATE

Prerequisites: Qualifying domestic fuel/energy item

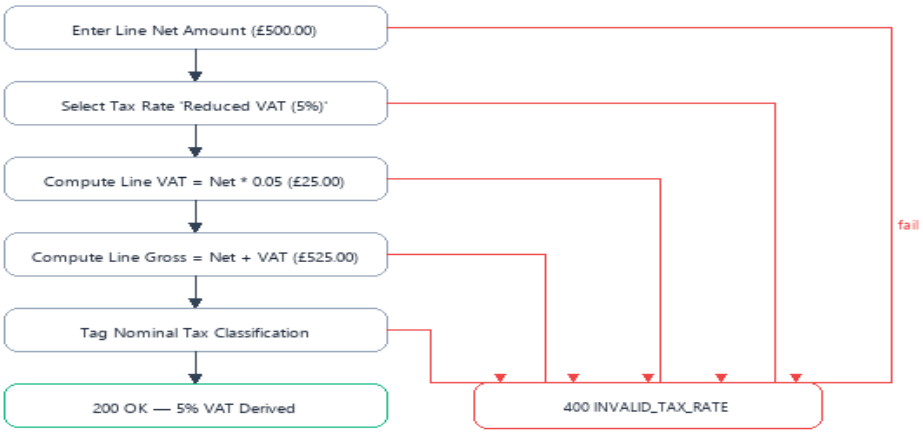

Figure 042 — UK Reduced 5% VAT Line Derivation Flow Architecture

Acceptance Standard: Assert 5% reduced VAT calculates accurately on qualifying items.

TC-043: Zero-Rated (0%) VAT Classification

Category: Tax Calculation | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 400 ZERO_RATE_MISCLASSIFIED

Prerequisites: Books, printed materials or food products

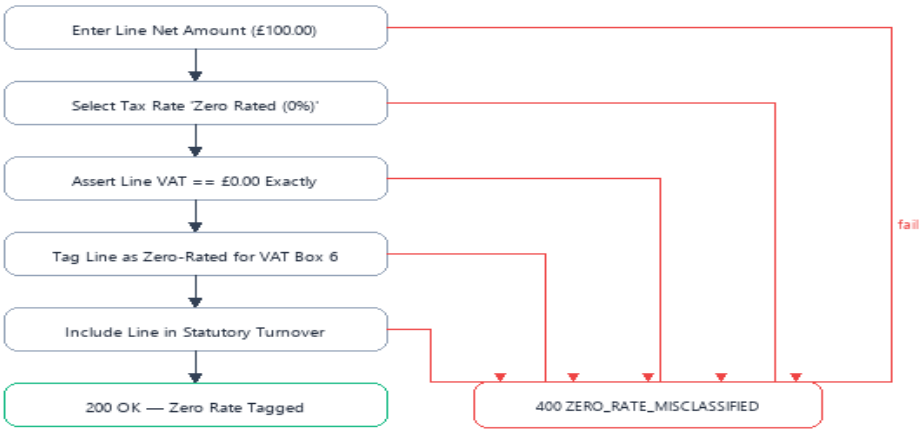

Figure 043 — Zero-Rated (0%) VAT Classification Flow Architecture

Acceptance Standard: Assert zero-rated items report in VAT Box 6 without generating tax liability.

TC-044: VAT Exempt Sales Classification

Category: Tax Calculation | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 400 EXEMPT_MISCLASSIFIED

Prerequisites: Exempt financial / educational service

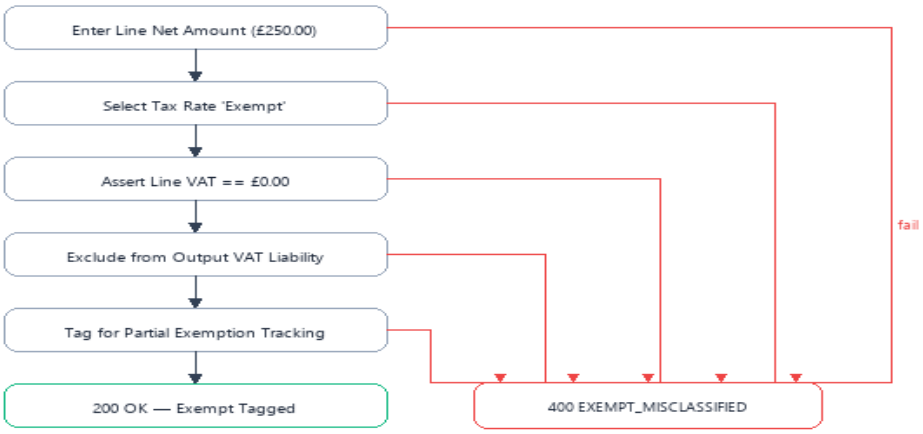

Figure 044 — VAT Exempt Sales Classification Flow Architecture

Acceptance Standard: Assert exempt sales do not generate VAT liability or input tax entitlement.

TC-045: CIS Domestic Reverse Charge Application

Category: Construction Sector | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 400 CIS_REVERSE_CHARGE_ERR

Prerequisites: UK construction subcontractor invoicing main contractor

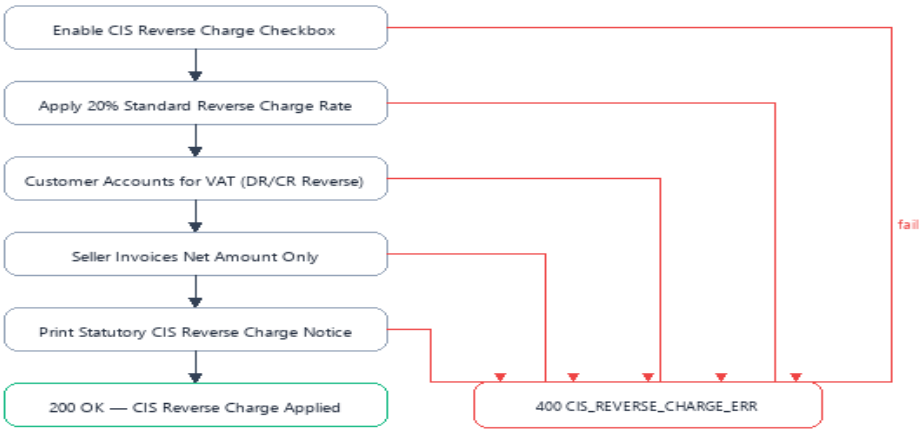

Figure 045 — CIS Domestic Reverse Charge Application Flow Architecture

Acceptance Standard: Assert invoice prints statutory HMRC reverse charge wording.

TC-046: Invoice Total Arithmetic Validation Gate

Category: Invoice Validation | **Tester Role:** Posting Engine | **Expected Rejection:** ASSERT 422 ARITHMETIC_TOTAL_MISMATCH

Prerequisites: User approves invoice for issue

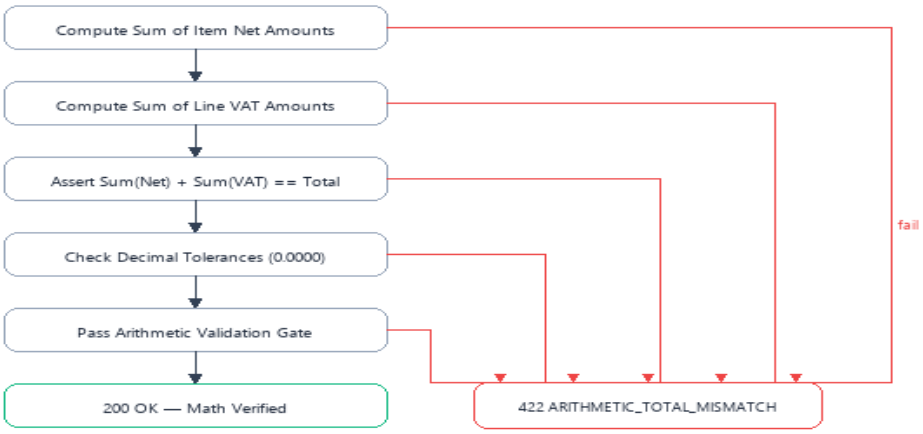

Figure 046 — Invoice Total Arithmetic Validation Gate Flow Architecture

Acceptance Standard: Assert invoice total exactly equals sum of item net lines plus tax lines.

TC-047: Invoice Approval & General Ledger Posting

Category: Invoice Posting | **Tester Role:** Billing Clerk | **Expected Rejection:** ASSERT 400 APPROVAL_VALIDATION_ERR

Prerequisites: Invoice passes arithmetic gate

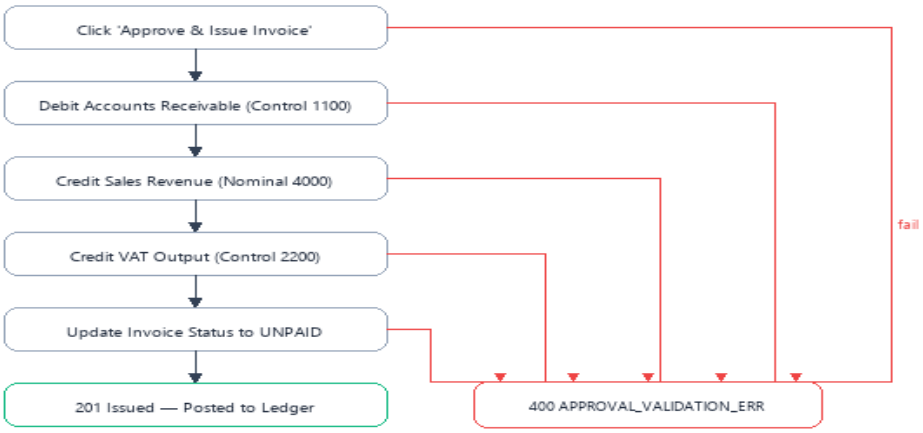

Figure 047 — Invoice Approval & General Ledger Posting Flow Architecture

Acceptance Standard: Assert approving an invoice synchronously creates balanced GL journal.

TC-048: Customer Subledger Balance Synchronization

Category: Commercial Subledgers | **Tester Role:** Subledger Engine | **Expected Rejection:** ASSERT 500 SUBLEDGER_SYNC_FAILED

Prerequisites: Invoice posted to ledger

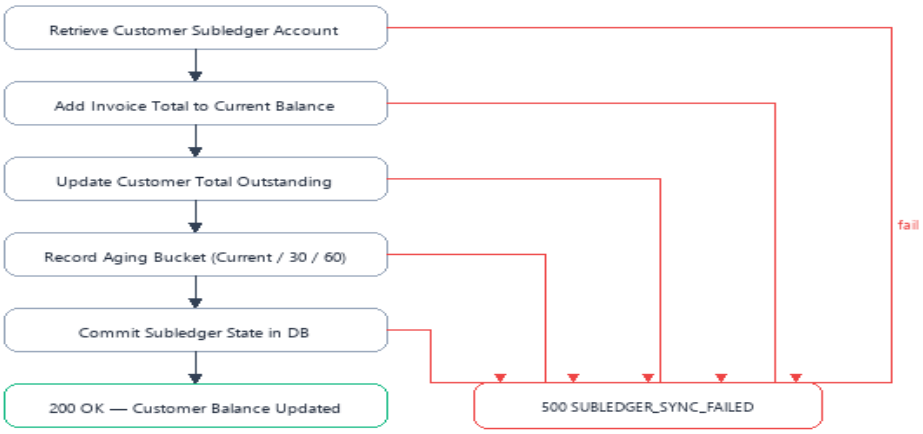

Figure 048 — Customer Subledger Balance Synchronization Flow Architecture

Acceptance Standard: Assert customer subledger balance increments immediately upon posting.

TC-049: Customer Statement Chronological Running Balance

Category: Customer Reporting | **Tester Role:** Billing Clerk / Client | **Expected Rejection:** ASSERT 200 STATEMENT_GENERATED

Prerequisites: Customer requests account statement

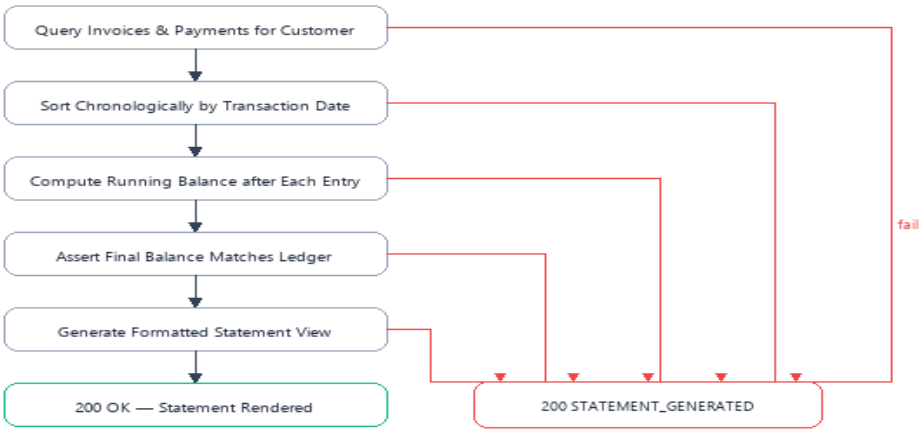

Figure 049 — Customer Statement Chronological Running Balance Flow Architecture

Acceptance Standard: Assert statement running balance tracks debits, credits, and net owed.

TC-050: Print-Ready A4 Invoice PDF Compilation

Category: Document Generation | **Tester Role:** Billing Clerk / Client | **Expected Rejection:** ASSERT 500 PDF_RENDER_FAILED

Prerequisites: Customer requires official PDF

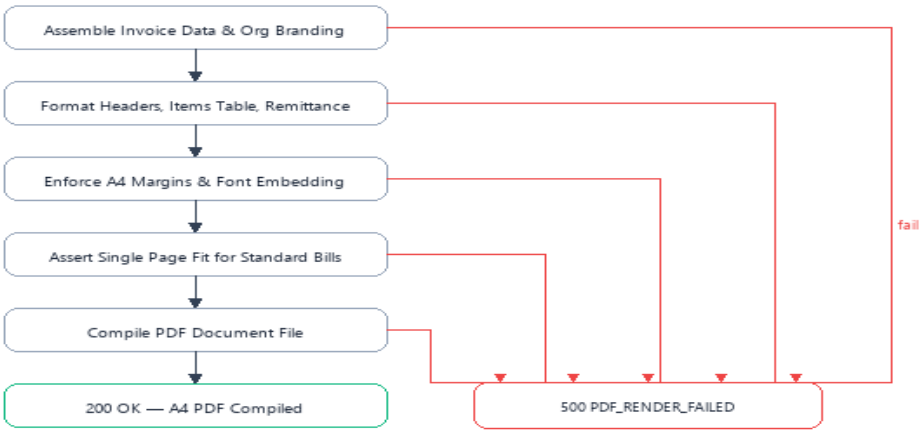

Figure 050 — Print-Ready A4 Invoice PDF Compilation Flow Architecture

Acceptance Standard: Assert PDF generates within 2s with company numbers and VAT details.

TC-051: Public Magic Token Invoice View Access

Category: Client Experience | **Tester Role:** External Customer | **Expected Rejection:** ASSERT 404 TOKEN_EXPIRED_OR_INVALID

Prerequisites: Client clicks link in email

Figure 051 — Public Magic Token Invoice View Access Flow Architecture

Acceptance Standard: Assert client accesses view without being prompted for password.

TC-052: Client Portal Brand Consistency Verification

Category: Client Experience | **Tester Role:** External Customer | **Expected Rejection:** ASSERT 200 BRANDING_VERIFIED

Prerequisites: Client viewing invoice online

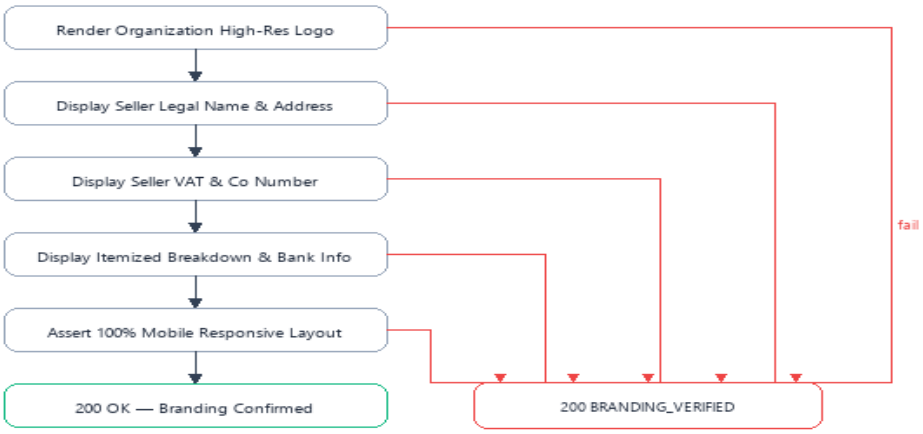

Figure 052 — Client Portal Brand Consistency Verification Flow Architecture

Acceptance Standard: Assert client view displays consistent company identity on all devices.

TC-053: Online Credit Card Payment Initiation

Category: Payment Gateway | **Tester Role:** External Customer | **Expected Rejection:** ASSERT 400 INVALID_PAYMENT_AMOUNT

Prerequisites: Client ready to settle invoice

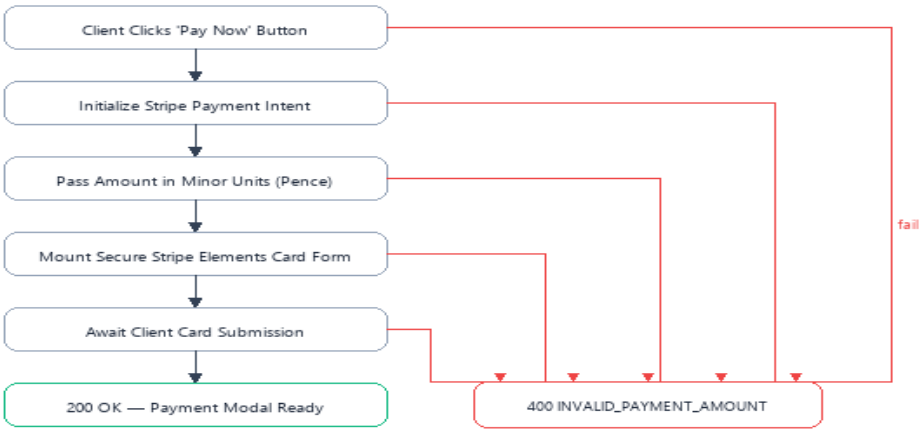

Figure 053 — Online Credit Card Payment Initiation Flow Architecture

Acceptance Standard: Assert payment intent amount matches invoice total pence exactly.

TC-054: Payment Idempotency & Double-Click Shield

Category: Client-Side Security | **Tester Role:** External Customer | **Expected Rejection:** ASSERT 409 DUPLICATE_SUBMISSION_BLOCKED

Prerequisites: Client clicks pay button rapidly

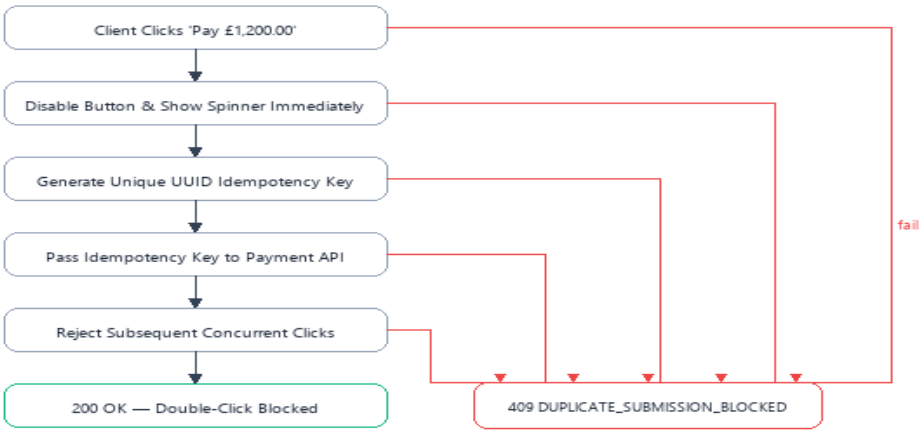

Figure 054 — Payment Idempotency & Double-Click Shield Flow Architecture

Acceptance Standard: Assert rapid multi-clicking cannot produce duplicate card charges.

TC-055: Declined Card Friendly Error Handling

Category: Payment Gateway | **Tester Role:** External Customer | **Expected Rejection:** ASSERT 402 CARD_DECLINED_BY_BANK

Prerequisites: Bank declines submitted card

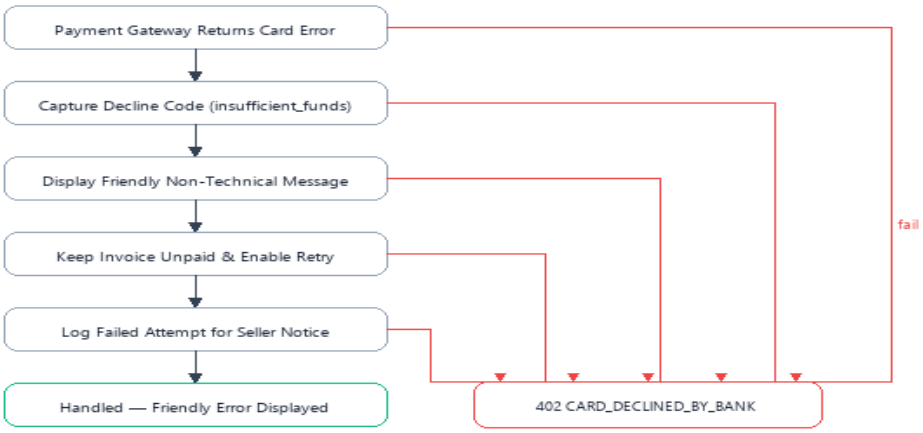

Figure 055 — Declined Card Friendly Error Handling Flow Architecture

Acceptance Standard: Assert clear actionable error shown without exposing technical stack trace.

TC-056: Instant Payment Confirmation & Status Flip

Category: Payment Gateway | **Tester Role:** System Webhook | **Expected Rejection:** ASSERT 500 WEBHOOK_PROCESSING_FAILED

Prerequisites: Stripe payment succeeds

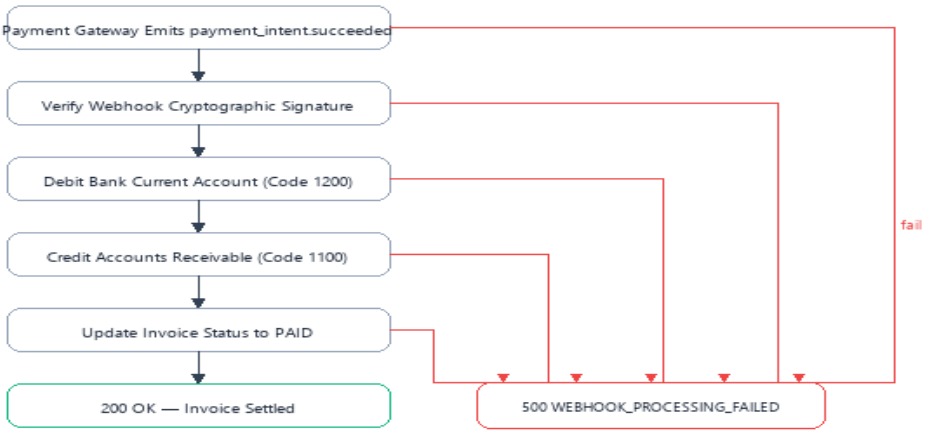

Figure 056 — Instant Payment Confirmation & Status Flip Flow Architecture

Acceptance Standard: Assert invoice flips to PAID and cash is recorded in general ledger.

TC-057: Automated Client Payment Receipt Delivery

Category: Client Communications | **Tester Role:** Mail Engine | **Expected Rejection:** ASSERT 200 RECEIPT_DISPATCHED

Prerequisites: Payment processed successfully

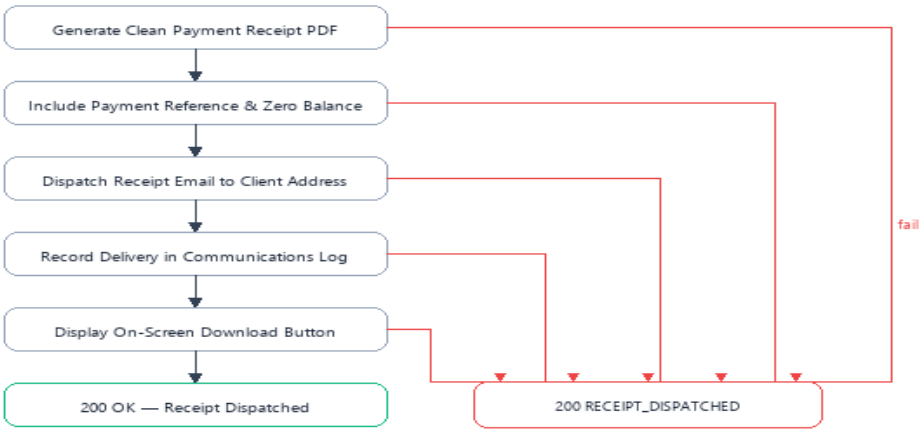

Figure 057 — Automated Client Payment Receipt Delivery Flow Architecture

Acceptance Standard: Assert payment confirmation email delivers within 30 seconds of charge.

TC-058: Self-Service Client Historical Statements

Category: Client Experience | **Tester Role:** External Customer | **Expected Rejection:** ASSERT 200 CLIENT_PORTAL_SUCCESS

Prerequisites: Client reviewing past trading history

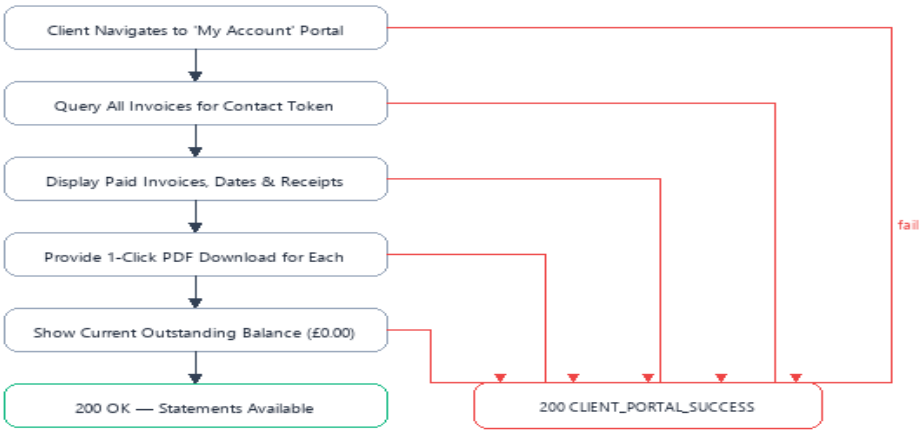

Figure 058 — Self-Service Client Historical Statements Flow Architecture

Acceptance Standard: Assert clients can retrieve past invoices without contacting finance staff.

TC-059: Supplier Contact Profile Setup & Classification

Category: Purchases & AP | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 INVALID_SUPPLIER_DATA

Prerequisites: Adding new supplier to vendor registry

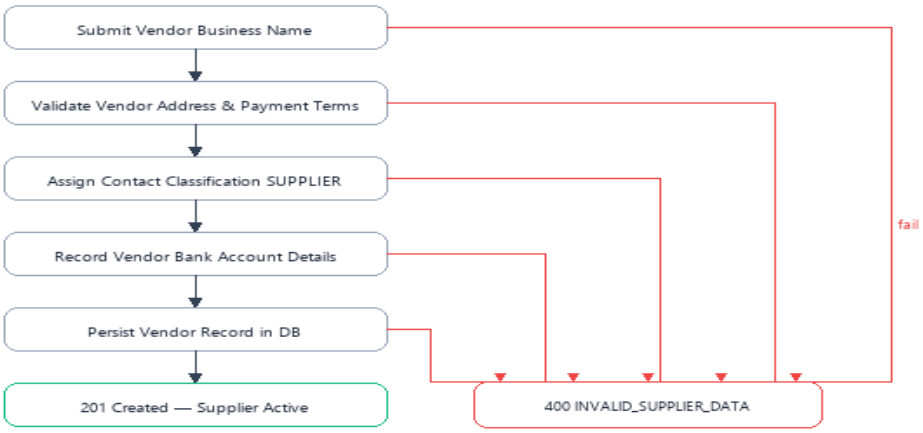

Figure 059 — Supplier Contact Profile Setup & Classification Flow Architecture

Acceptance Standard: Assert vendor record captures remittance details and terms.

TC-060: Supplier Bill Entry with Invoice Reference

Category: Purchases & AP | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 MISSING_SUPPLIER_REF

Prerequisites: Received invoice from supplier

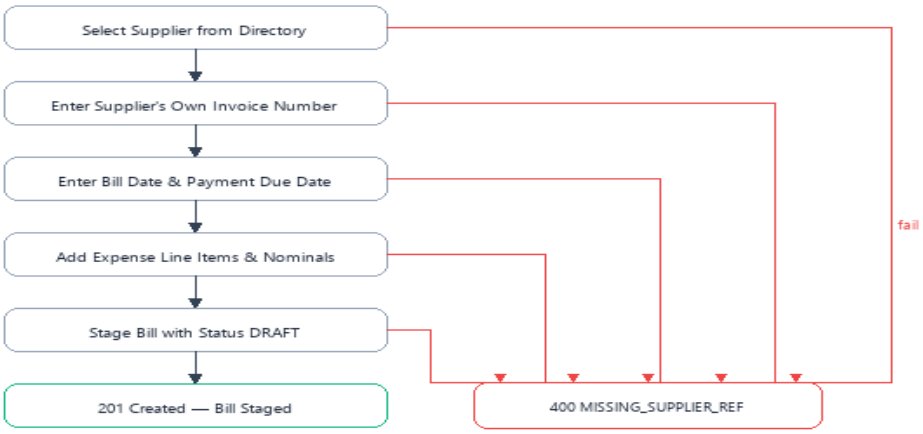

Figure 060 — Supplier Bill Entry with Invoice Reference Flow Architecture

Acceptance Standard: Assert supplier bills require vendor invoice reference number.

TC-061: Duplicate Supplier Bill Number Interception

Category: Fraud Prevention | **Tester Role:** Posting Engine | **Expected Rejection:** ASSERT 409 DUPLICATE_SUPPLIER_BILL

Prerequisites: Entering supplier bill

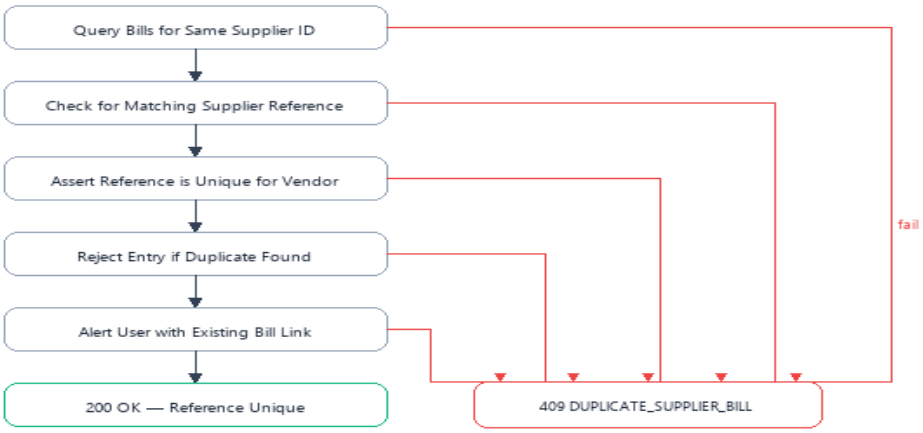

Figure 061 — Duplicate Supplier Bill Number Interception Flow Architecture

Acceptance Standard: Assert duplicate vendor bill numbers are blocked to prevent double-payment.

TC-062: Input VAT Recovery Classification Rule

Category: Tax Accounting | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 INVALID_INPUT_VAT

Prerequisites: Entering allowable commercial purchase

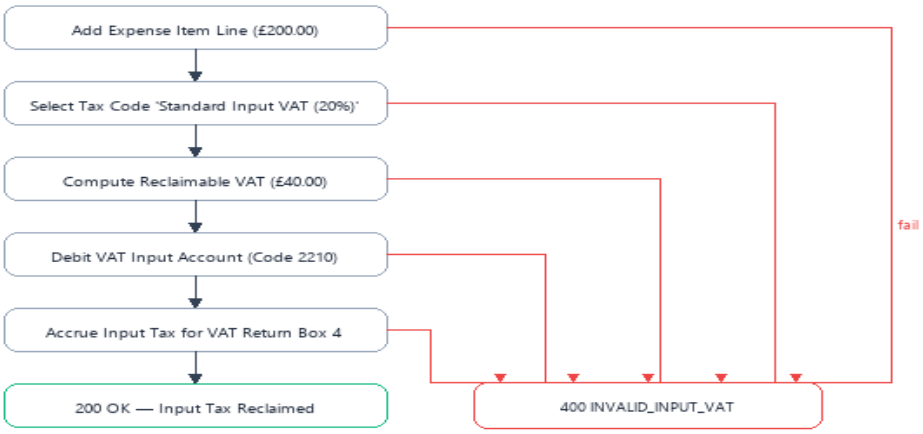

Figure 062 — Input VAT Recovery Classification Rule Flow Architecture

Acceptance Standard: Assert valid commercial input VAT is routed to VAT Box 4 reclaim.

TC-063: Non-Deductible Business Expense Handling

Category: Tax Accounting | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 TAX_TAG_INVALID

Prerequisites: Client entertainment or non-allowable expense

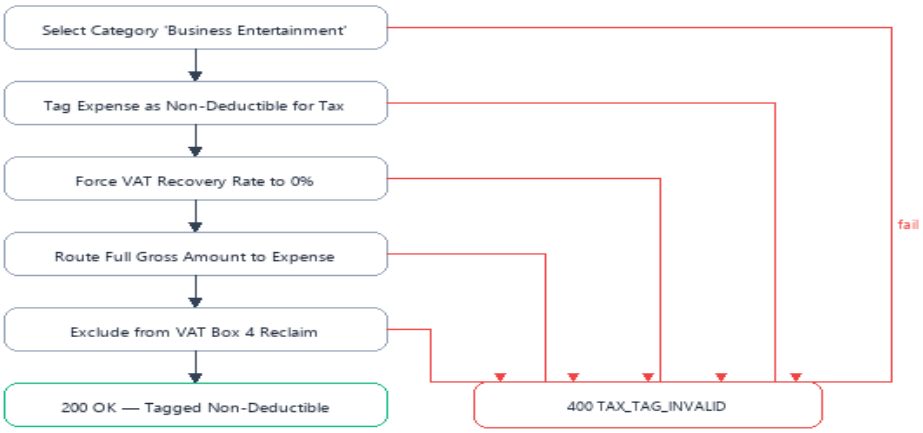

Figure 063 — Non-Deductible Business Expense Handling Flow Architecture

Acceptance Standard: Assert entertainment expenses do not illegally reclaim input VAT.

TC-064: Accounts Payable General Ledger Posting

Category: Ledger Engine | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 422 AP_POSTING_FAILED

Prerequisites: Supplier bill approved for payment

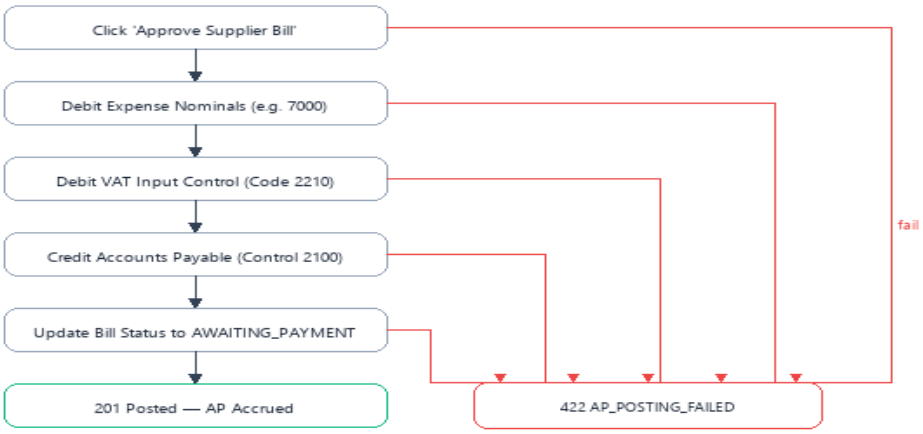

Figure 064 — Accounts Payable General Ledger Posting Flow Architecture

Acceptance Standard: Assert approving supplier bill synchronously updates AP balance.

TC-065: Supplier Outgoing Payment Allocation

Category: Purchases & AP | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 OVERPAYMENT_UNSUPPORTED

Prerequisites: Paying supplier from company bank

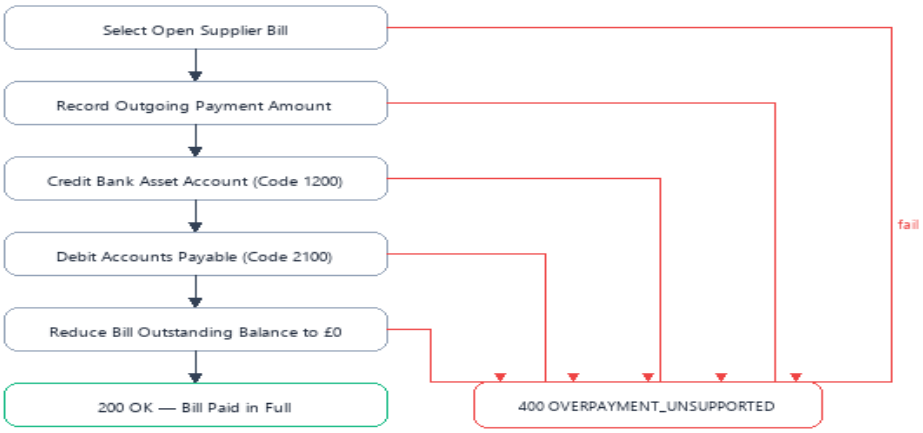

Figure 065 — Supplier Outgoing Payment Allocation Flow Architecture

Acceptance Standard: Assert supplier payment clears AP subledger and decrements bank account.

TC-066: Supplier Partial Payment Allocation

Category: Purchases & AP | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 200 PARTIAL_PAYMENT_RECORDED

Prerequisites: Paying installment on large bill

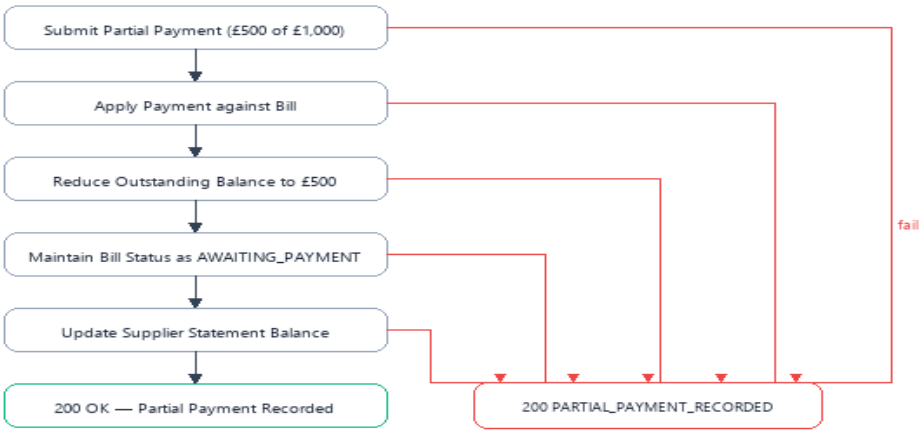

Figure 066 — Supplier Partial Payment Allocation Flow Architecture

Acceptance Standard: Assert partial payments decrement AP while keeping bill active.

TC-067: Supplier Credit Note Offset Application

Category: Purchases & AP | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 CREDIT_EXCEEDS_BILL

Prerequisites: Supplier issues credit note for returned goods

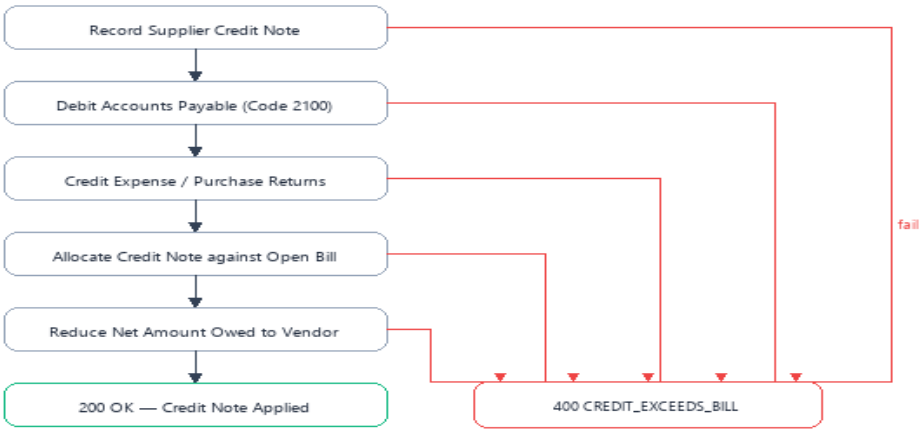

Figure 067 — Supplier Credit Note Offset Application Flow Architecture

Acceptance Standard: Assert credit notes correctly offset outstanding supplier balances.

TC-068: Supplier Remittance Advice Generation

Category: Document Generation | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 200 REMITTANCE_DISPATCHED

Prerequisites: Batch supplier payments executed

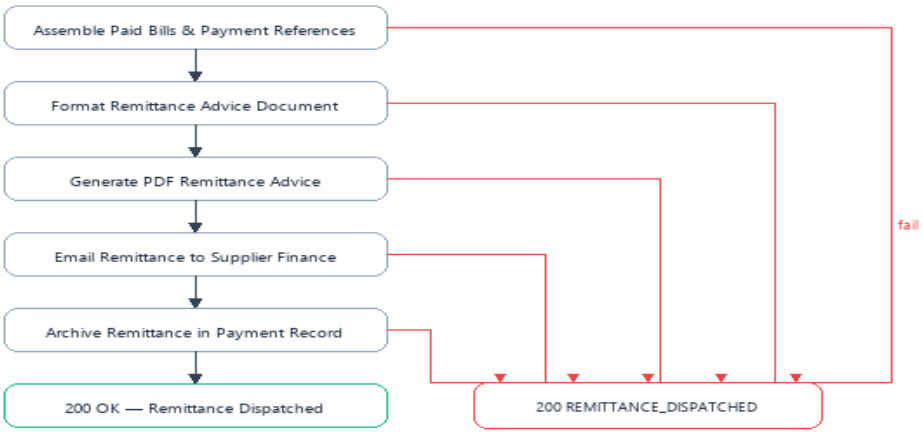

Figure 068 — Supplier Remittance Advice Generation Flow Architecture

Acceptance Standard: Assert supplier remittance advice details exact invoices being settled.

TC-069: Mobile Photo Receipt Upload & Normalization

Category: AI Intelligence | **Tester Role:** Staff Member | **Expected Rejection:** ASSERT 400 UNSUPPORTED_IMAGE_FORMAT

Prerequisites: Employee submits paper expense receipt

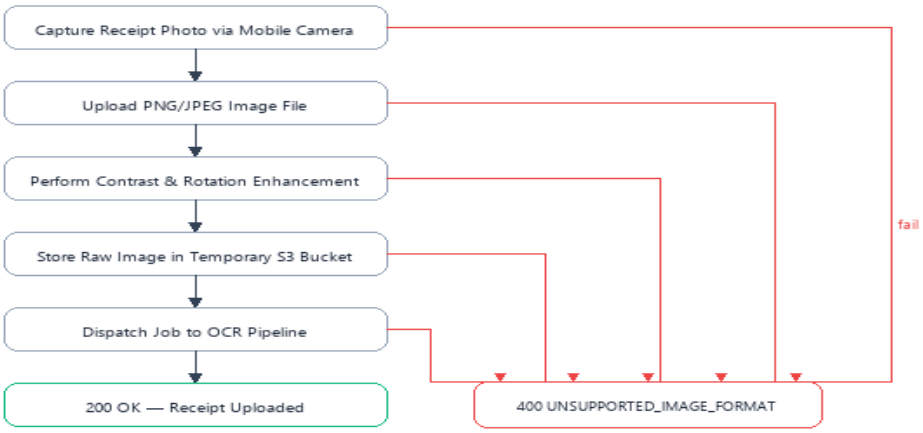

Figure 069 — Mobile Photo Receipt Upload & Normalization Flow Architecture

Acceptance Standard: Assert images are normalized and enhanced before text recognition.

TC-070: Multi-Page PDF Supplier Bill Parsing

Category: AI Intelligence | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 CORRUPTED_PDF

Prerequisites: Received multi-page digital supplier PDF

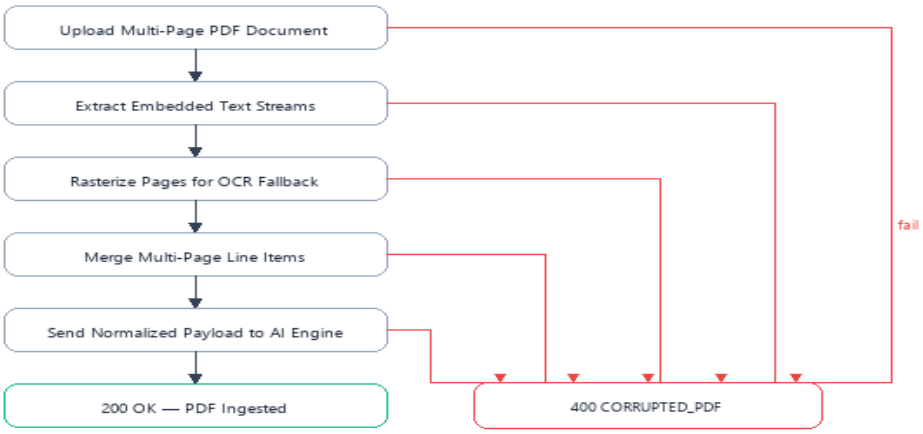

Figure 070 — Multi-Page PDF Supplier Bill Parsing Flow Architecture

Acceptance Standard: Assert multi-page bills extract lines across all pages without dropping items.

TC-071: AI Vendor Identification & Confidence Scoring

Category: AI Intelligence | **Tester Role:** AI Engine | **Expected Rejection:** ASSERT 422 VENDOR_UNRECOGNIZED

Prerequisites: Raw OCR text generated

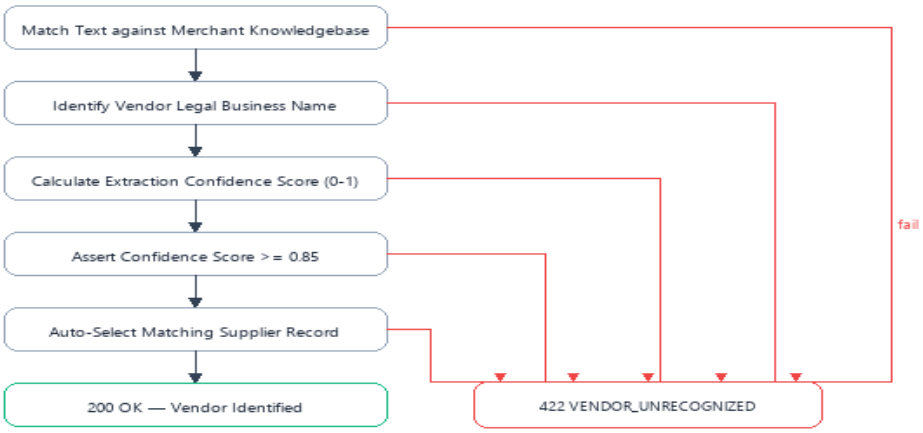

Figure 071 — AI Vendor Identification & Confidence Scoring Flow Architecture

Acceptance Standard: Assert vendor recognition scores below 85% trigger human review.

TC-072: AI Date & Amount Precision Parsing

Category: AI Intelligence | **Tester Role:** AI Engine | **Expected Rejection:** ASSERT 422 DATE_PARSE_FAILED

Prerequisites: OCR text analyzed

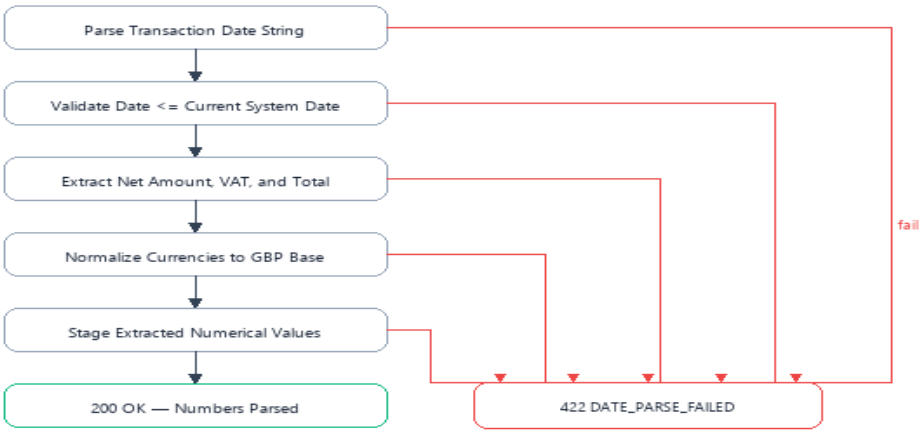

Figure 072 — AI Date & Amount Precision Parsing Flow Architecture

Acceptance Standard: Assert future transaction dates are flagged and blocked.

TC-073: AI Arithmetic Balancing Guardrail Rule

Category: AI Guardrails | **Tester Role:** AI Safety Engine | **Expected Rejection:** ASSERT 422 AI_MATH_MISMATCH

Prerequisites: Numerical fields extracted

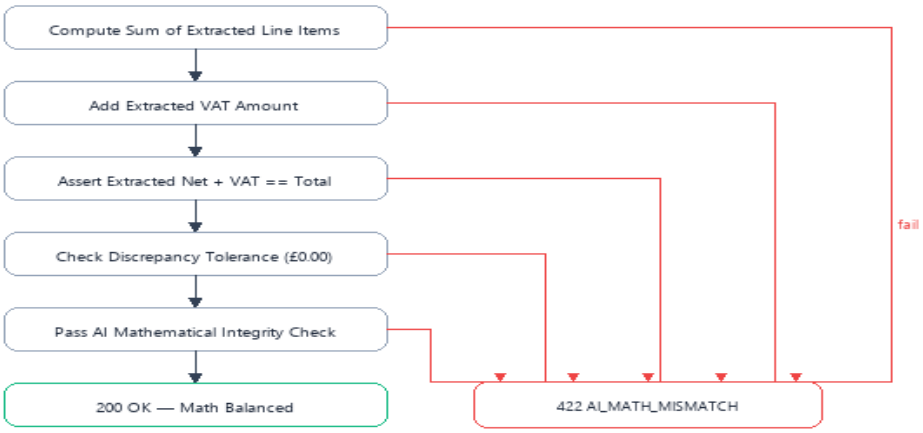

Figure 073 — AI Arithmetic Balancing Guardrail Rule Flow Architecture

Acceptance Standard: Assert AI hallucinated totals that do not match lines are intercepted.

TC-074: Low Confidence Human-in-the-Loop Intercept

Category: AI Guardrails | **Tester Role:** AI Safety Engine | **Expected Rejection:** ASSERT 422 HUMAN_REVIEW_ENFORCED

Prerequisites: Receipt blurry or handwriting detected

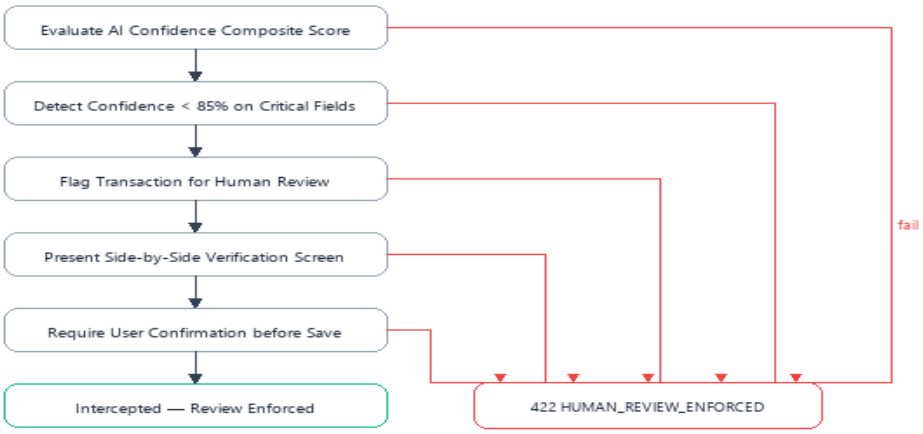

Figure 074 — Low Confidence Human-in-the-Loop Intercept Flow Architecture

Acceptance Standard: Assert unclear receipts never post to the general ledger automatically.

TC-075: Smart Expense Category Recommendation

Category: AI Intelligence | **Tester Role:** AI Engine | **Expected Rejection:** ASSERT 200 CATEGORY_SUGGESTED

Prerequisites: Vendor identified (e.g. Costa Coffee)

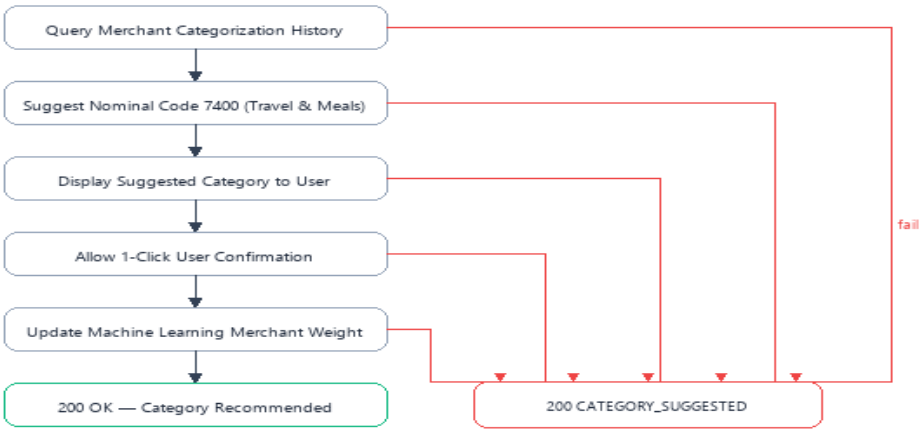

Figure 075 — Smart Expense Category Recommendation Flow Architecture

Acceptance Standard: Assert categorization recommendations learn from historical user approvals.

TC-076: Permanent Cloud Storage Image Archiving

Category: Statutory Compliance | **Tester Role:** Storage Service | **Expected Rejection:** ASSERT 500 S3_UPLOAD_FAILED

Prerequisites: Expense confirmed and approved

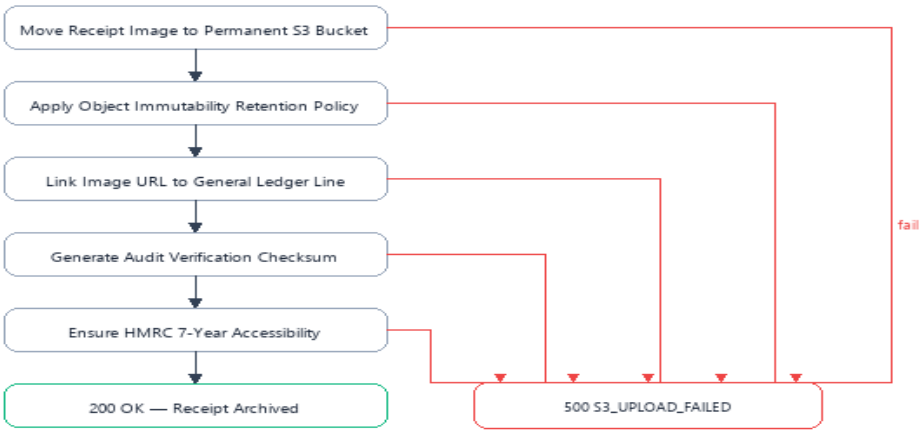

Figure 076 — Permanent Cloud Storage Image Archiving Flow Architecture

Acceptance Standard: Assert expense transactions permanently link to accessible receipt images.

TC-077: Business Bank Account Nominal Account Binding

Category: Banking Setup | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 INVALID_BANK_NOMINAL

Prerequisites: Configuring corporate current account

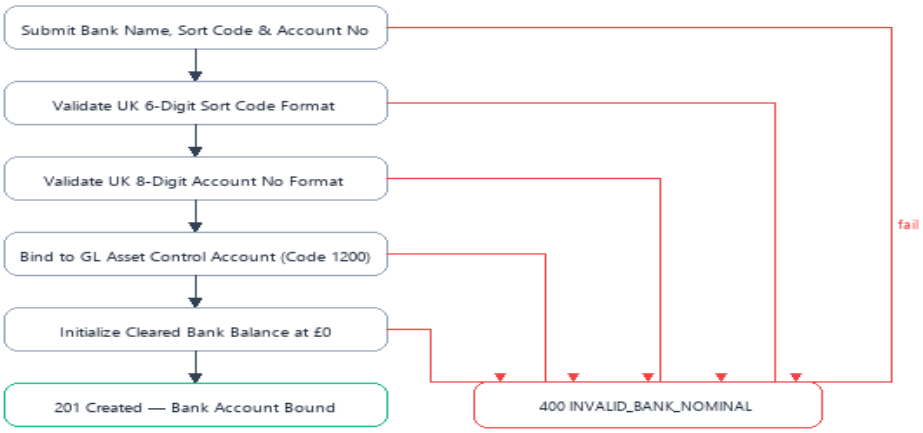

Figure 077 — Business Bank Account Nominal Account Binding Flow Architecture

Acceptance Standard: Assert bank accounts bind directly to isolated general ledger nominals.

TC-078: Bank Statement CSV Feed Parsing

Category: Banking Feeds | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 400 MALFORMED_CSV_HEADER

Prerequisites: Importing statement download from bank

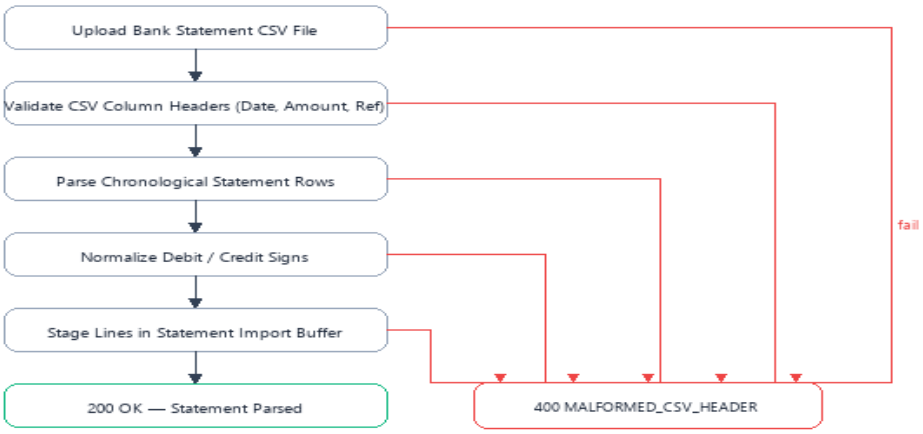

Figure 078 — Bank Statement CSV Feed Parsing Flow Architecture

Acceptance Standard: Assert malformed CSV structures are rejected before staging.

TC-079: Bank Statement Duplicate Line Hash Intercept

Category: Banking Feeds | **Tester Role:** Banking Engine | **Expected Rejection:** ASSERT 409 DUPLICATE_BANK_FEED_LINE

Prerequisites: Importing overlapping bank statement

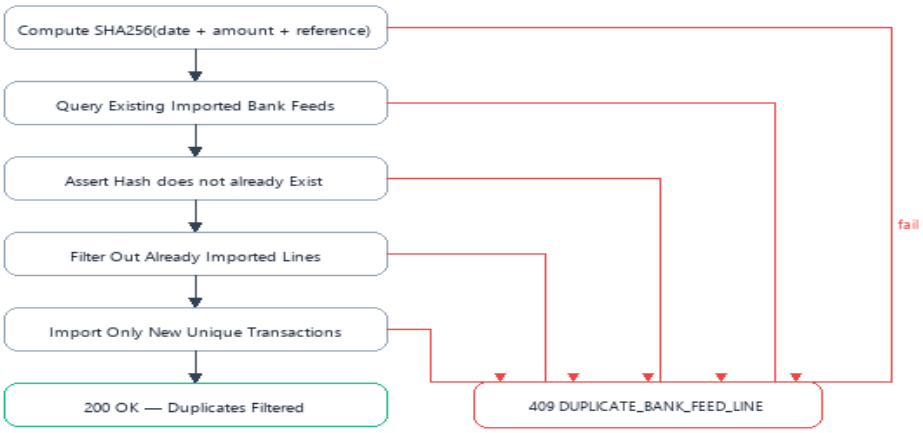

Figure 079 — Bank Statement Duplicate Line Hash Intercept Flow Architecture

Acceptance Standard: Assert overlapping bank statement imports never duplicate transactions.

TC-080: Automated Rule-Based Invoice Matching

Category: Bank Reconciliation | **Tester Role:** Reconciliation Engine | **Expected Rejection:** ASSERT 200 AUTO_MATCHED

Prerequisites: Bank transaction imported (£1,200 deposit)

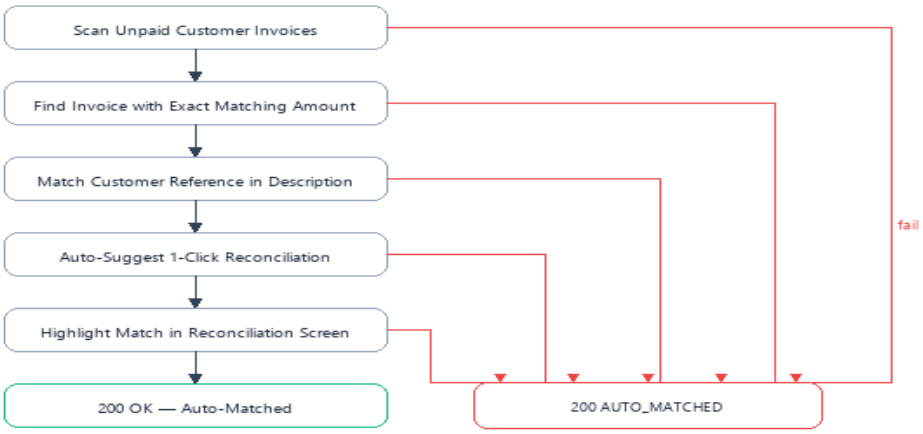

Figure 080 — Automated Rule-Based Invoice Matching Flow Architecture

Acceptance Standard: Assert exact amount and reference matches are presented for approval.

TC-081: Manual Multi-Transaction Bank Split Reconciliation

Category: Bank Reconciliation | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 SPLIT_MISMATCH

Prerequisites: Lump deposit pays multiple invoices

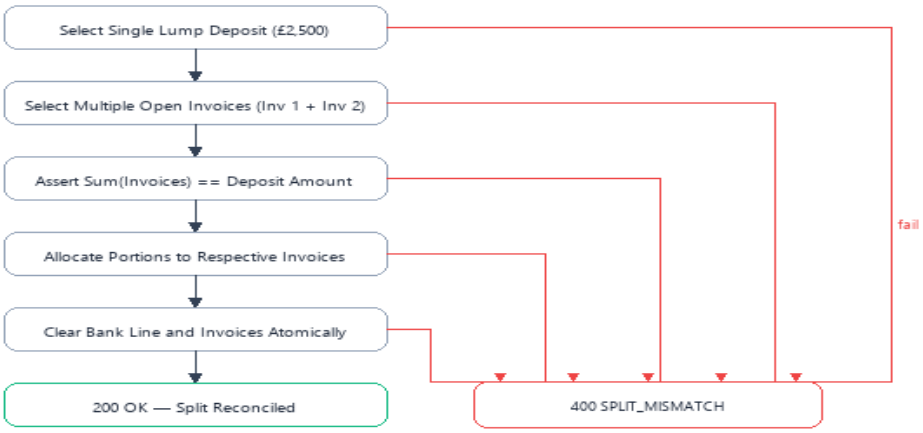

Figure 081 — Manual Multi-Transaction Bank Split Reconciliation Flow Architecture

Acceptance Standard: Assert multi-invoice reconciliation must match total deposit pennies.

TC-082: Unreconciled Bank Balance vs GL Equilibrium

Category: Ledger Integrity | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 200 BANK_EQUILIBRIUM_OK

Prerequisites: Running monthly bank reconciliation

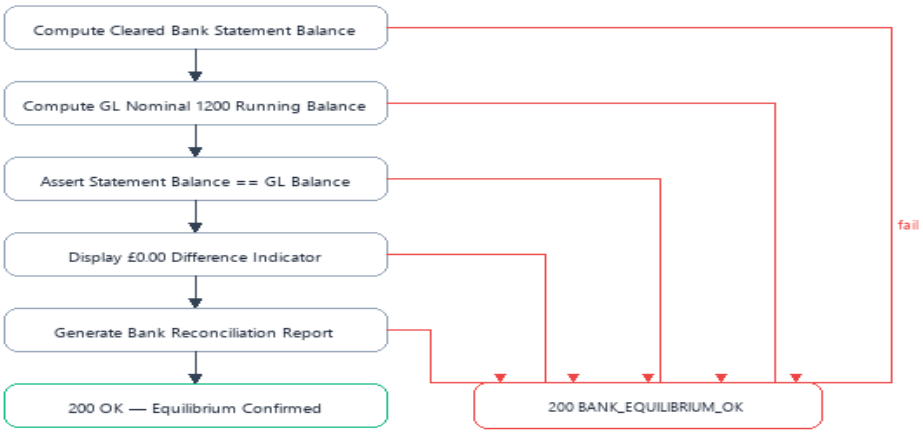

Figure 082 — Unreconciled Bank Balance vs GL Equilibrium Flow Architecture

Acceptance Standard: Assert bank statement matches general ledger cash account exactly.

TC-083: Reconciliation Clearance Locking Rule

Category: Audit Governance | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 403 CLEARED_TRANSACTION_LOCKED

Prerequisites: Transactions reconciled and cleared

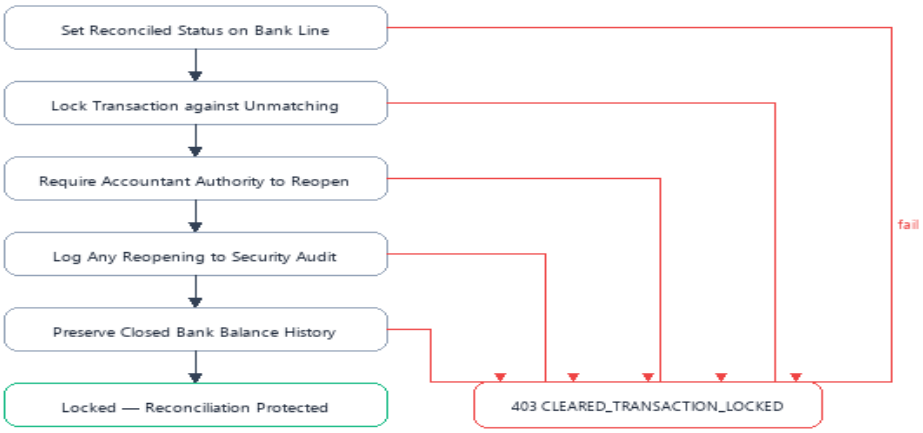

Figure 083 — Reconciliation Clearance Locking Rule Flow Architecture

Acceptance Standard: Assert reconciled bank lines cannot be deleted or modified casually.

TC-084: Realised Foreign Currency Exchange Gain/Loss

Category: Multi-Currency | **Tester Role:** Ledger Engine | **Expected Rejection:** ASSERT 200 FX_GAIN_LOSS_POSTED

Prerequisites: Settling USD invoice via GBP bank account

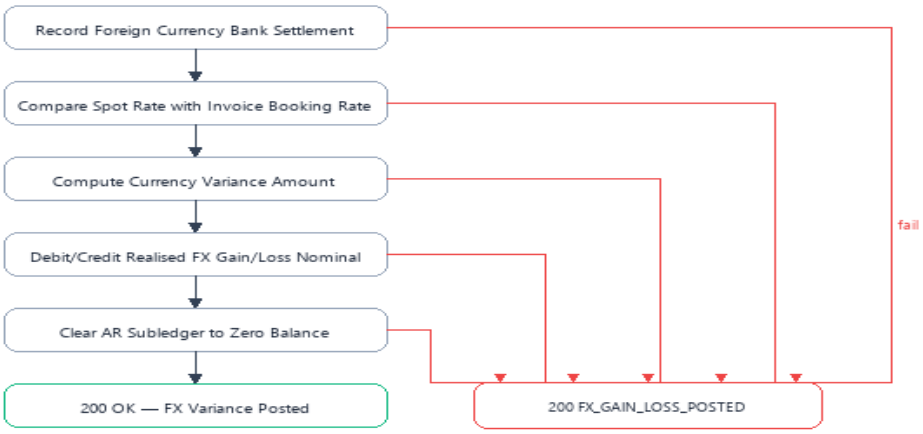

Figure 084 — Realised Foreign Currency Exchange Gain/Loss Flow Architecture

Acceptance Standard: Assert foreign exchange variances route automatically to P&L; accounts.

TC-085: Monthly Accounting Period Calendar Partitioning

Category: Period Governance | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 400 PERIOD_OVERLAP

Prerequisites: Setting up annual accounting periods

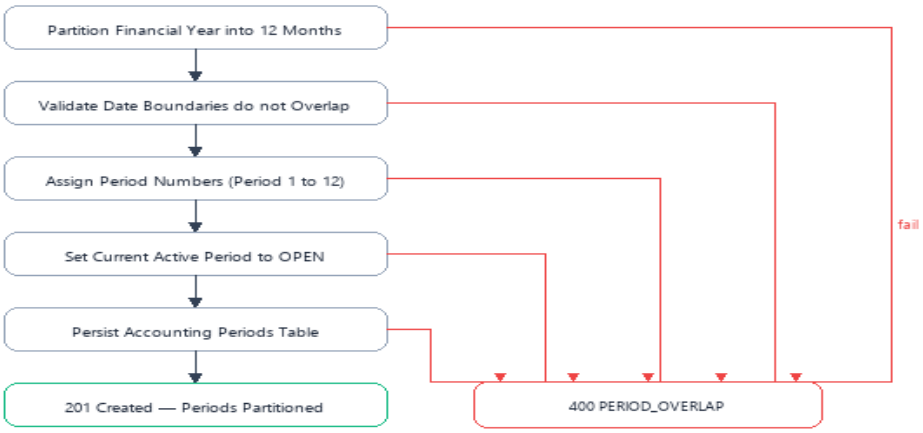

Figure 085 — Monthly Accounting Period Calendar Partitioning Flow Architecture

Acceptance Standard: Assert accounting periods cover calendar dates contiguously without gaps.

TC-086: Interim Monthly Accounting Period Close

Category: Period Governance | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 403 UNPOSTED_DRAFTS_IN_PERIOD

Prerequisites: Month-end accounts finalized

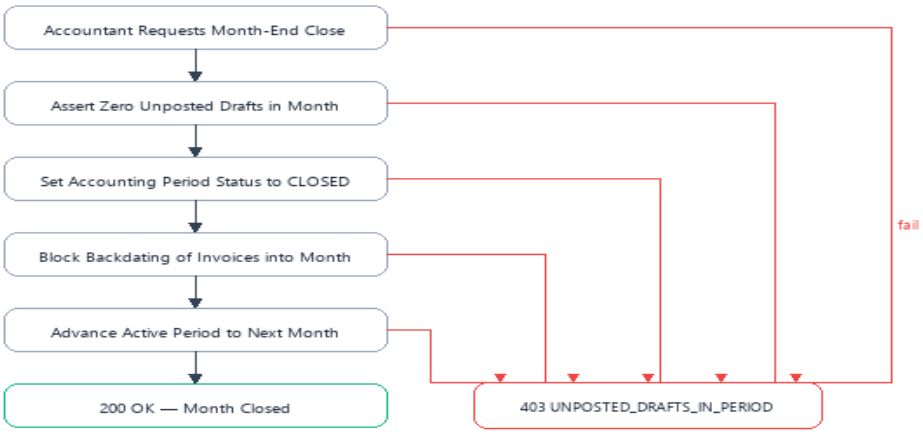

Figure 086 — Interim Monthly Accounting Period Close Flow Architecture

Acceptance Standard: Assert months with unposted drafts cannot be closed prematurely.

TC-087: Financial Year-End Final Trial Balance Check

Category: Year-End Closing | **Tester Role:** Certified Accountant | **Expected Rejection:** ASSERT 422 LEDGER_NOT_IN_BALANCE

Prerequisites: Preparing annual statutory closing

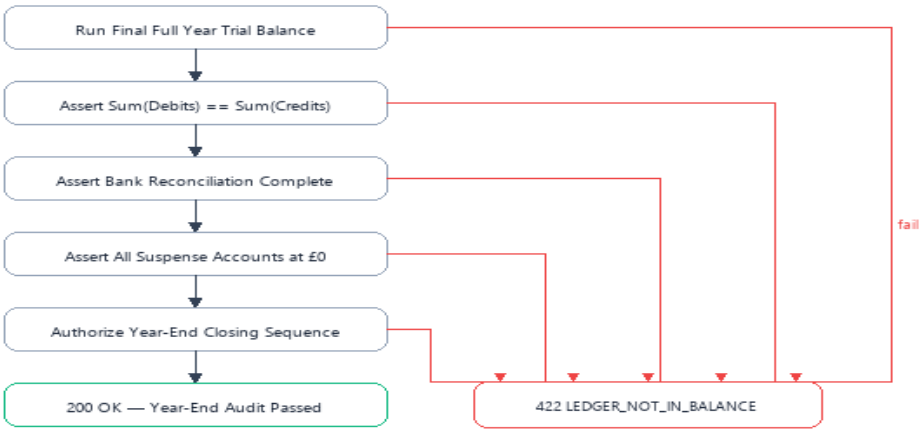

Figure 087 — Financial Year-End Final Trial Balance Check Flow Architecture

Acceptance Standard: Assert year-end closing is blocked if trial balance is out of equilibrium.

TC-088: Annual Retained Earnings Rollover Engine

Category: Year-End Closing | **Tester Role:** Accounting Engine | **Expected Rejection:** ASSERT 500 ROLLOVER_FAILED

Prerequisites: Year-end closing triggered

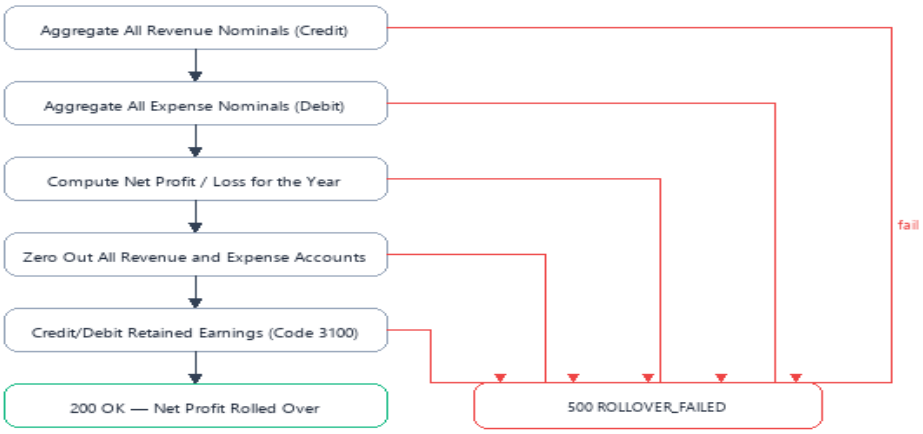

Figure 088 — Annual Retained Earnings Rollover Engine Flow Architecture

Acceptance Standard: Assert P&L; nominals reset to zero and net income rolls to Retained Earnings.

TC-089: Temporal Database Date-Lock Enforcement

Category: Statutory Immutability | **Tester Role:** PostgreSQL Engine | **Expected Rejection:** ASSERT 403 PERIOD_TEMPORALLY_LOCKED

Prerequisites: Attempting to post entry into closed year

Figure 089 — Temporal Database Date-Lock Enforcement Flow Architecture

Acceptance Standard: Assert database-level temporal constraints block backdating into filed years.

TC-090: Audited Emergency Period Reopening Workflow

Category: Period Governance | **Tester Role:** Business Owner / CPA | **Expected Rejection:** ASSERT 403 REOPEN_AUDIT_LOG_MANDATORY

Prerequisites: Audit adjustment required in closed period

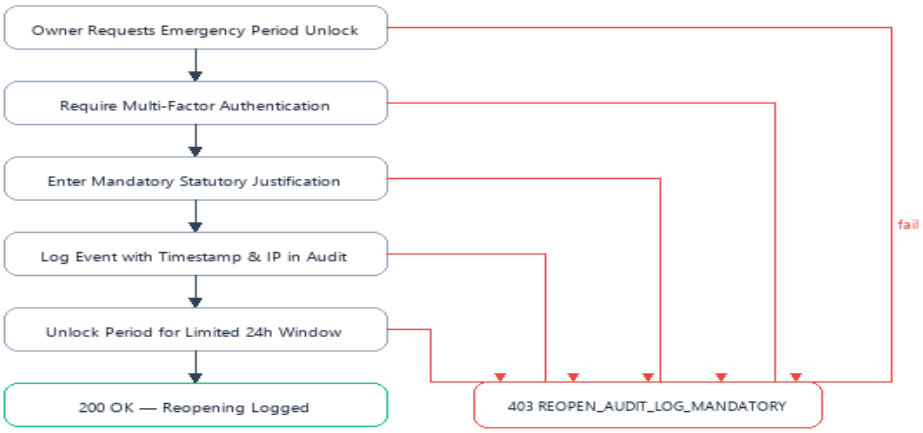

Figure 090 — Audited Emergency Period Reopening Workflow Flow Architecture

Acceptance Standard: Assert emergency period reopening is impossible without immutable audit logging.

TC-091: Trial Balance Report Equilibrium Derivation

Category: Financial Reporting | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 422 TB_OUT_OF_BALANCE

Prerequisites: Generating Trial Balance report

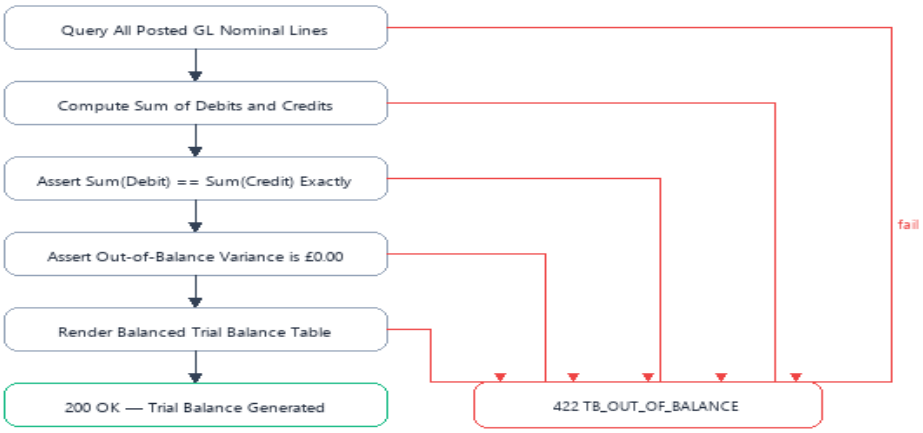

Figure 091 — Trial Balance Report Equilibrium Derivation Flow Architecture

Acceptance Standard: Assert trial balance reports display zero variance across all accounts.

TC-092: Profit & Loss (Income Statement) Derivation

Category: Financial Reporting | **Tester Role:** Business Owner / CPA | **Expected Rejection:** ASSERT 200 PNL_GENERATED

Prerequisites: Reviewing company profitability

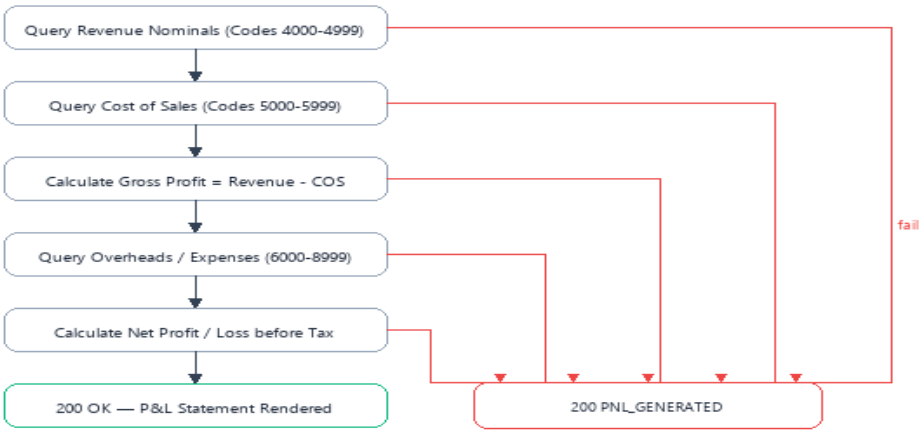

Figure 092 — Profit & Loss (Income Statement) Derivation Flow Architecture

Acceptance Standard: Assert P&L; accurately calculates gross margin and operating profit.

TC-093: Balance Sheet Statement Derivation & Balance

Category: Financial Reporting | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 422 BALANCE_SHEET_UNBALANCED

Prerequisites: Generating balance sheet report

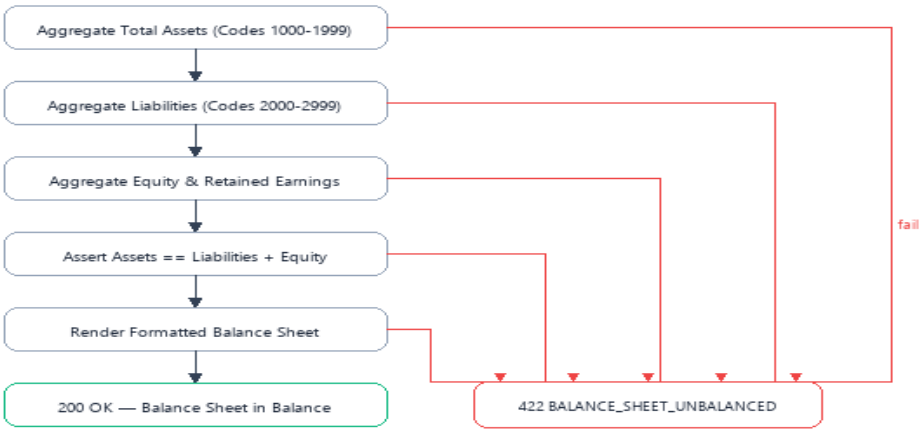

Figure 093 — Balance Sheet Statement Derivation & Balance Flow Architecture

Acceptance Standard: Assert balance sheet satisfies fundamental accounting equation.

TC-094: Quarterly HMRC VAT Return Box 1-9 Derivation

Category: Tax Compliance | **Tester Role:** Accountant | **Expected Rejection:** ASSERT 422 VAT_CALCULATION_INVALID

Prerequisites: Preparing quarterly VAT filing

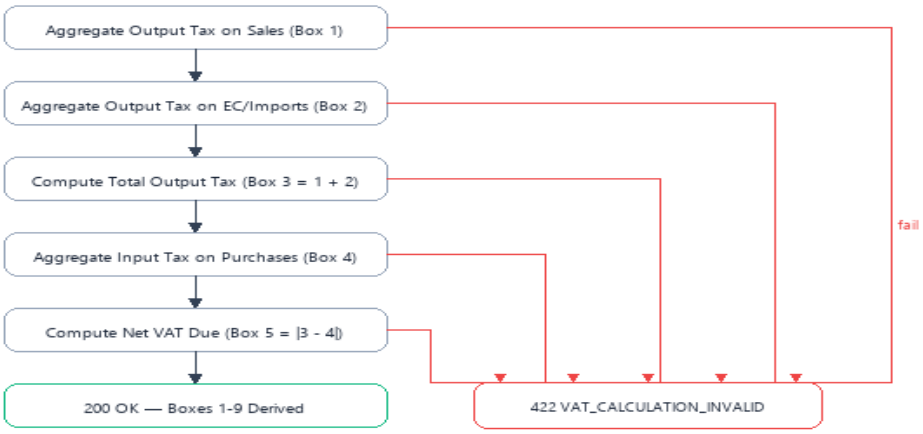

Figure 094 — Quarterly HMRC VAT Return Box 1-9 Derivation Flow Architecture

Acceptance Standard: Assert statutory UK VAT 9 boxes derive directly from general ledger lines.

TC-095: HMRC Making Tax Digital (MTD) API Submission

Category: Statutory Compliance | **Tester Role:** Certified Accountant | **Expected Rejection:** ASSERT 502 HMRC_GATEWAY_REJECTED

Prerequisites: Submitting finalized VAT return to HMRC

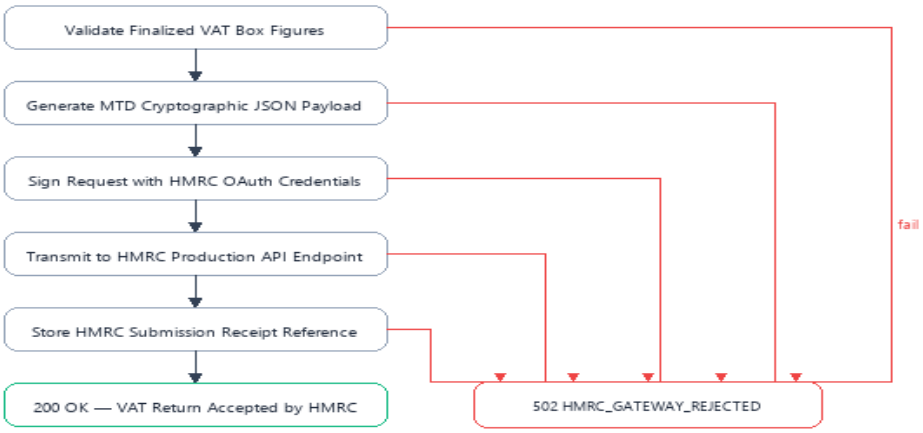

Figure 095 — HMRC Making Tax Digital (MTD) API Submission Flow Architecture

Acceptance Standard: Assert digital filing produces cryptographic HMRC confirmation receipt.

TC-096: Viewer Role Write Operation Block Enforcement

Category: Security Governance | **Tester Role:** Auditor / Read-Only User | **Expected Rejection:** ASSERT 403 VIEWER_READ_ONLY

Prerequisites: User with VIEWER role clicks 'Create'

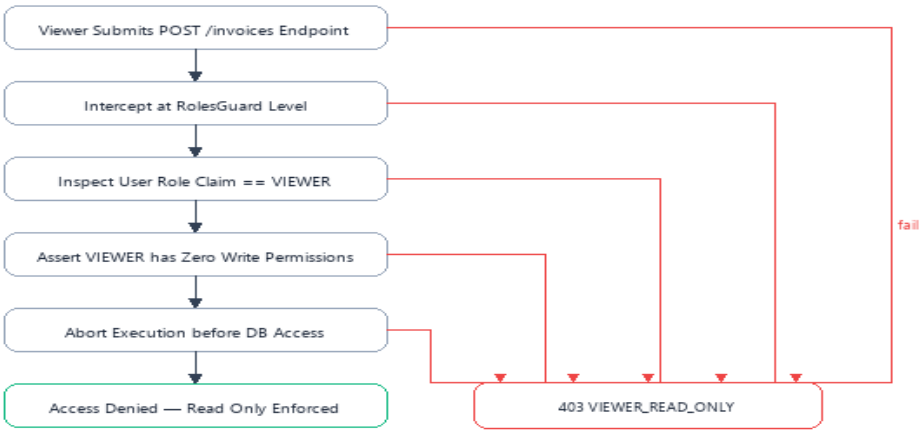

Figure 096 — Viewer Role Write Operation Block Enforcement Flow Architecture

Acceptance Standard: Assert users with VIEWER role cannot execute mutating operations.

TC-097: Bookkeeper Settings Modification Prohibition

Category: Security Governance | **Tester Role:** Bookkeeper | **Expected Rejection:** ASSERT 403 BOOKKEEPER_RESTRICTED

Prerequisites: Bookkeeper attempts altering bank account

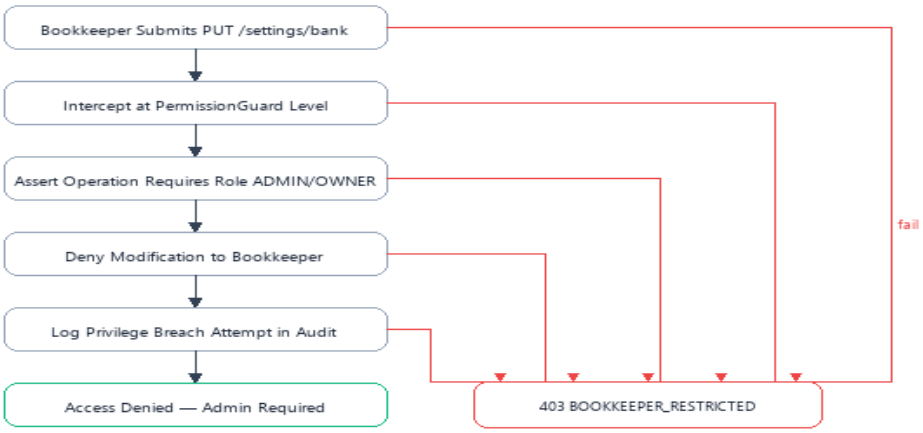

Figure 097 — Bookkeeper Settings Modification Prohibition Flow Architecture

Acceptance Standard: Assert operational staff cannot modify financial infrastructure settings.

TC-098: Accountant Period Close Authority Validation

Category: Governance & Compliance | **Tester Role:** Bookkeeper vs Accountant | **Expected Rejection:** ASSERT 403 ACCOUNTANT_ROLE_REQUIRED

Prerequisites: Attempting to close financial year

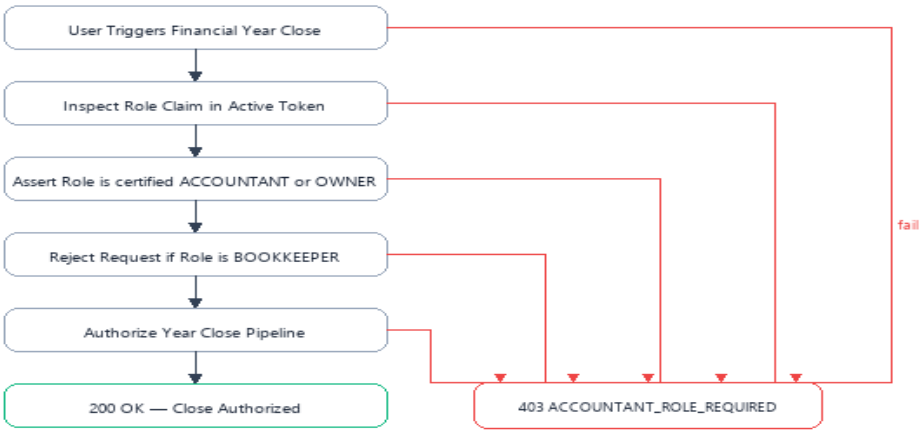

Figure 098 — Accountant Period Close Authority Validation Flow Architecture

Acceptance Standard: Assert only qualified accountants or owners can close accounting periods.

TC-099: Audit Trail Cryptographic SHA-256 Hash Chain

Category: GRC Compliance | **Tester Role:** Audit Service | **Expected Rejection:** ASSERT 500 AUDIT_CHAIN_BROKEN

Prerequisites: Any ledger event executed

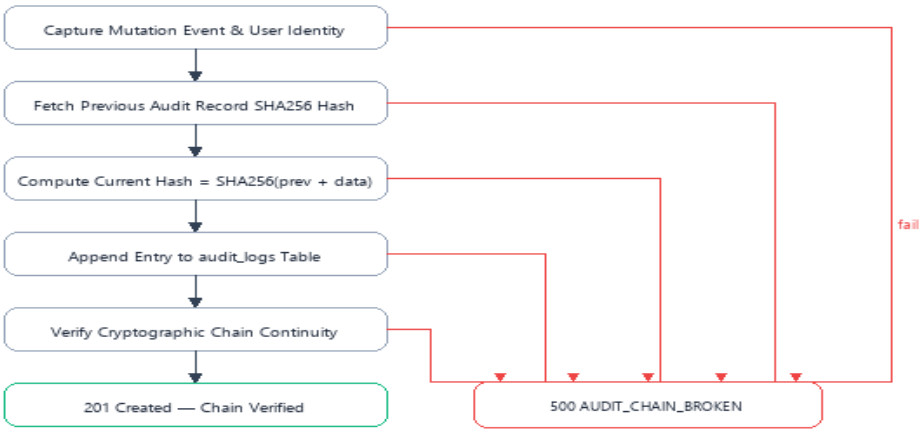

Figure 099 — Audit Trail Cryptographic SHA-256 Hash Chain Flow Architecture

Acceptance Standard: Assert audit log entries are cryptographically chained to prevent tampering.

TC-100: Database Direct Deletion Prevention Trigger

Category: Statutory Immutability | **Tester Role:** PostgreSQL Engine | **Expected Rejection:** ASSERT 500 DIRECT_SQL_MODIFICATION_BLOCKED

Prerequisites: Direct SQL attack attempting to delete audit

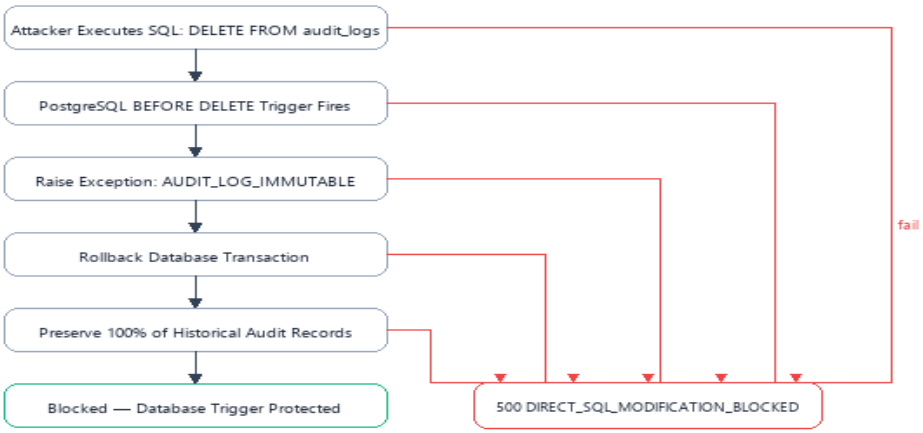

Figure 100 — Database Direct Deletion Prevention Trigger Flow Architecture

Acceptance Standard: Assert database triggers physically prevent deletion of compliance audit logs.
