Complete 50-Phase Product Roadmap

Core double-entry accounting, ledger compliance & AI document pipeline.

TOTAL PHASES	DONE	IN PROGRESS	PENDING	VERIFY
50	13 (26%)	19 (38%)	17 (34%)	1 (2%)

Category 1: Platform & Access

Phase	Phase Name	Summary / Scope	Status
1	Project & Database Foundation	Application structure, database setup and core configuration.	Done
2	Authentication & Sessions	Secure login, session handling, token validation and logout.	In Progress
3	Multi-Organisation Support	Separate businesses and isolate each organisation's data.	Done
4	Role-Based Permissions	Enforce access rights for owners, administrators, accountants, bookkeepers and viewers.	Done

Category 2: Core Accounting

Phase	Phase Name	Summary / Scope	Status
5	Chart of Accounts	Create and manage asset, liability, equity, revenue and expense accounts.	Done
6	Financial Years & Periods	Configure financial years, accounting periods and period-locking rules.	Done
7	Manual Journals	Create accounting journals with debit and credit lines.	Done
8	Journal Validation	Check balancing, account validity, period status and journal rules.	Done
9	Posting Engine	Post validated journals to the ledger through one central engine.	Done
10	Journal Reversals	Correct posted transactions using traceable reversal journals.	Done

Category 3: Ledger & Reporting

Phase	Phase Name	Summary / Scope	Status
11	General Ledger	View account-level transactions and running balances.	Done
12	Trial Balance	Compare debit and credit totals across accounts.	Done
13	Audit & Integrity	Record important changes and protect accounting history.	Done
14	Financial Reports	Complete financial statements and reporting calculations.	In Progress
29	Reporting Enhancements	Improve report filters, period selection and report coverage.	In Progress
30	Export Engine	Export reports and data safely, with correct pagination and formatting.	In Progress

Category 4: Testing & Security

Phase	Phase Name	Summary / Scope	Status
15	Financial Testing	Test double-entry accounting, decimal accuracy, posting and reversals.	In Progress
16	Security Hardening	Fix authentication, configuration, permissions and release-security gaps.	In Progress

37	**Production Security & Compliance**	Strengthen production secrets, access controls, auditability and data protection.	In Progress
39	**Complete Testing & Integrity**	Run automated tests, database integration tests and end-to-end financial checks.	In Progress

Category 5: Sales & Receivables

Phase	Phase Name	Summary / Scope	Status
17	**Customer & Supplier Contacts**	Manage customer and supplier details.	Done
18	**Sales Invoices**	Create invoices, calculate totals and connect sales to accounting.	In Progress
19	**Customer Payments**	Record receipts and allocate payments against invoices.	Pending
20	**Credit Notes & Refunds**	Handle invoice corrections, credit notes and customer refunds.	Pending
21	**Accounts Receivable**	Track unpaid invoices, customer balances and overdue amounts.	In Progress

Category 6: Purchases & Payables

Phase	Phase Name	Summary / Scope	Status
22	**Supplier Bills**	Create and manage purchase invoices separately from sales invoices.	Pending
23	**Supplier Payments**	Record supplier payments and allocate them against bills.	Pending
24	**Accounts Payable**	Track supplier balances, outstanding bills and amounts due.	In Progress
25	**Expenses & Receipts**	Record business expenses and attach supporting receipts.	Pending

Category 7: VAT, Tax & Banking

Phase	Phase Name	Summary / Scope	Status
26	**Central VAT & Tax Engine**	Apply configurable tax codes, VAT rules and tax calculations consistently.	Pending
27	**Bank Transaction Import**	Import bank statements and transaction files.	Pending
28	**Bank Reconciliation**	Match bank transactions with accounting records and investigate differences.	Pending

Category 8: Documents & Business Workflows

Phase	Phase Name	Summary / Scope	Status
31	**Documents & Attachments**	Store and link invoices, receipts and other business documents securely.	In Progress
32	**Email & Notifications**	Send invoice emails, payment reminders and system notifications.	In Progress
33	**Approval Workflows**	Require appropriate approval for selected transactions and actions.	Pending
34	**Period Closing**	Review balances and safely lock accounting periods.	In Progress
35	**Year-End Accounting**	Support year-end adjustments, closing entries and opening balances.	Pending
36	**External Integrations**	Connect banking, payment, tax or other external services where required.	Pending

Category 9: Infrastructure & Release

Phase	Phase Name	Summary / Scope	Status
38	**AWS Production Infrastructure**	Configure hosting, database, backups, monitoring and deployment in AWS.	Pending
40	**Beta & Commercial Release**	Prepare onboarding, production checks, documentation and the customer launch.	Pending

Category 10: AI Document Intelligence

Phase	Phase Name	Summary / Scope	Status
41	**AI Prototype Safety Audit**	Fix existing AI risks, including incorrect invoice direction, fabricated fields and unsafe tax defaults.	Pending
42	**Upload, Storage & OCR**	Build a reliable document upload and text-extraction pipeline.	In Progress
43	**Real LLM Provider**	Integrate a real language model instead of relying only on heuristic text matching.	Pending
44	**Background Processing**	Process documents asynchronously and manage retries and failures.	Pending
45	**Extraction Validation**	Validate invoice numbers, dates, totals, VAT and extracted fields before use.	In Progress
46	**Transaction & Entity Detection**	Identify sales versus purchases and resolve the correct customer or supplier.	In Progress
47	**Tax & Account Classification**	Suggest suitable tax codes, ledger accounts and classifications without unsafe defaults.	In Progress
48	**Human Review & Permissions**	Require authorised users to review AI suggestions before creating accounting drafts.	In Progress
49	**AI Evaluation & Regression Tests**	Measure extraction accuracy and test against known documents and failure cases.	Verify
50	**AI Monitoring & Rollout**	Monitor accuracy, failures, usage costs and rollout performance.	Pending
