Blynt — Non-IT Visual Guide

Complete Business & Client-Side Use Cases and Test Cases (Pure Visual Workflows & Pass/Fail Criteria)

Executive Overview: This document is engineered for **business owners, external clients, accountants, and non-technical QA testers**. It eliminates technical software jargon, providing clear visual roadmaps for how money flows, how customers interact with online invoices, and how built-in safety shields protect accounting books from errors.

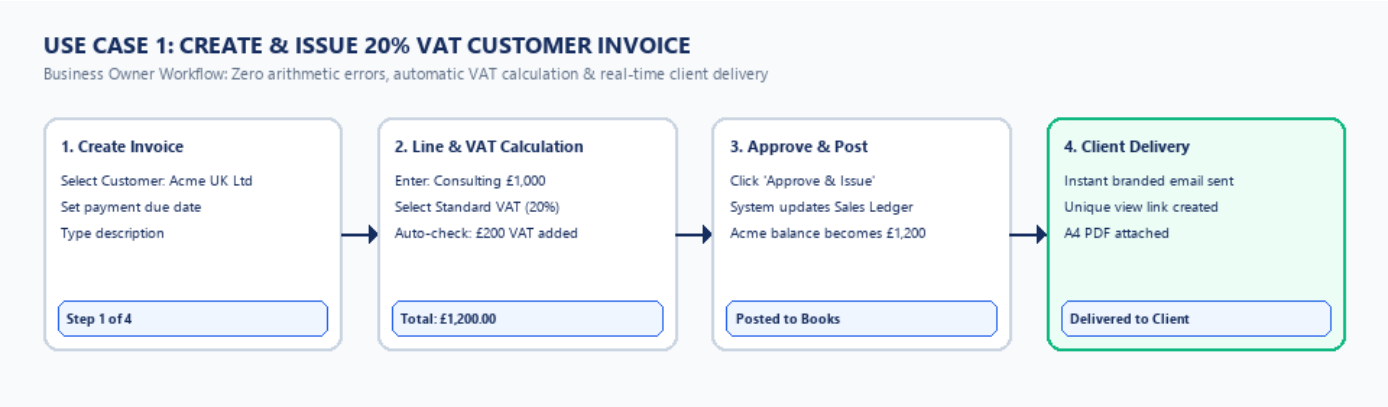

1. Master System & User Role Interaction Map

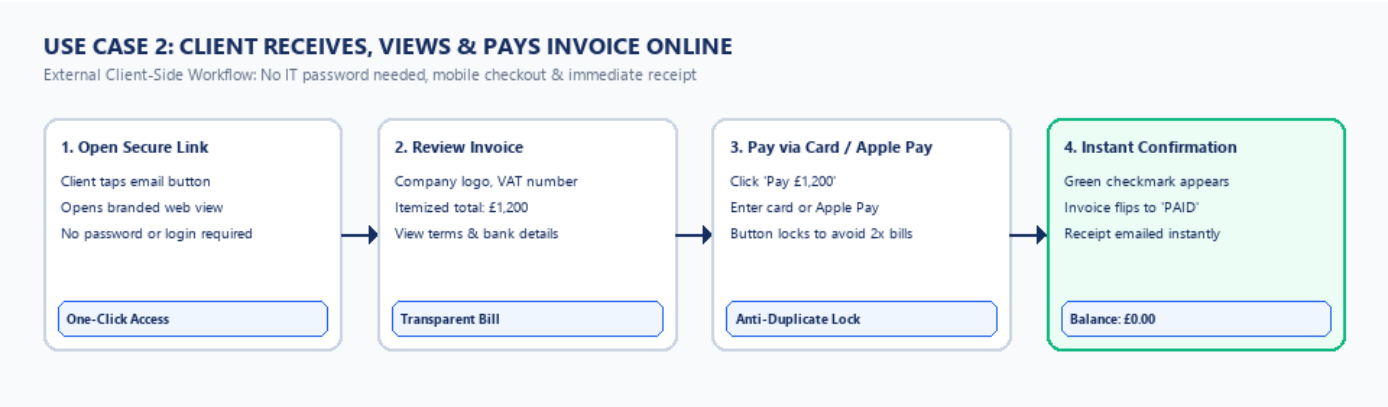

2. Business & Client-Side Use Cases (User Journeys)

Step-by-step visual roadmaps showing how everyday people complete critical financial tasks.

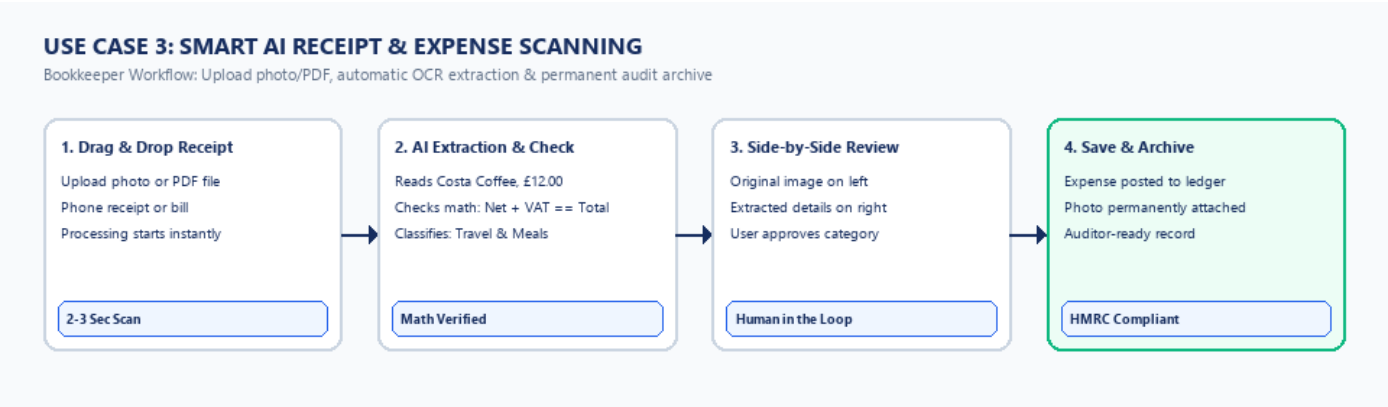

Use Case 1: Business Invoicing with Automatic 20% VAT

Use Case 2: Client Receives, Views & Pays Invoice Online

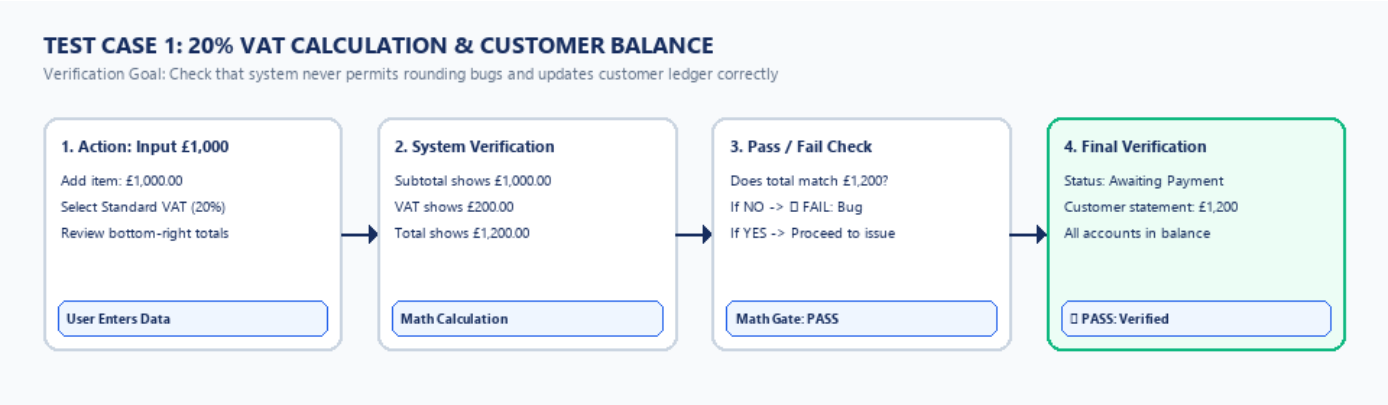

Use Case 3: AI Document Scanner for Expense Receipts

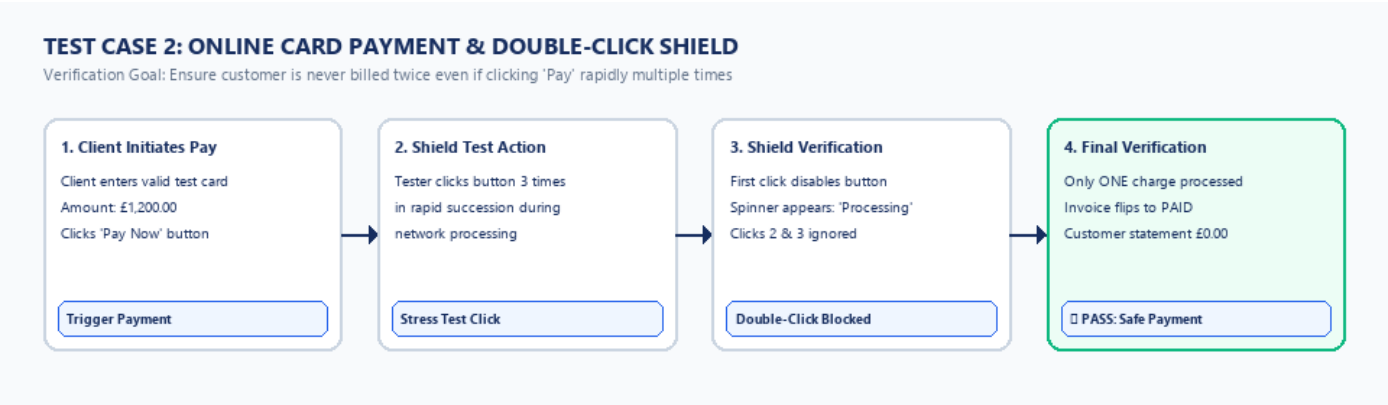

3. Test Cases & Verification Gateways (Pass / Fail)

Visual checkpoints used during testing sessions to verify system reliability.

Test Case 1: 20% VAT Calculation & Customer Balance Sync

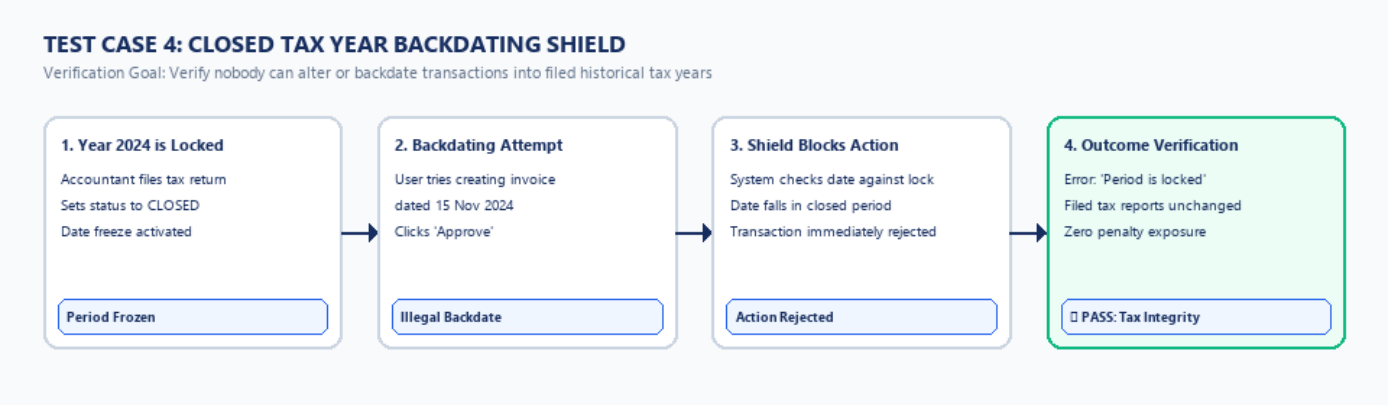

Test Case 2: Online Card Payment & Double-Click Protection

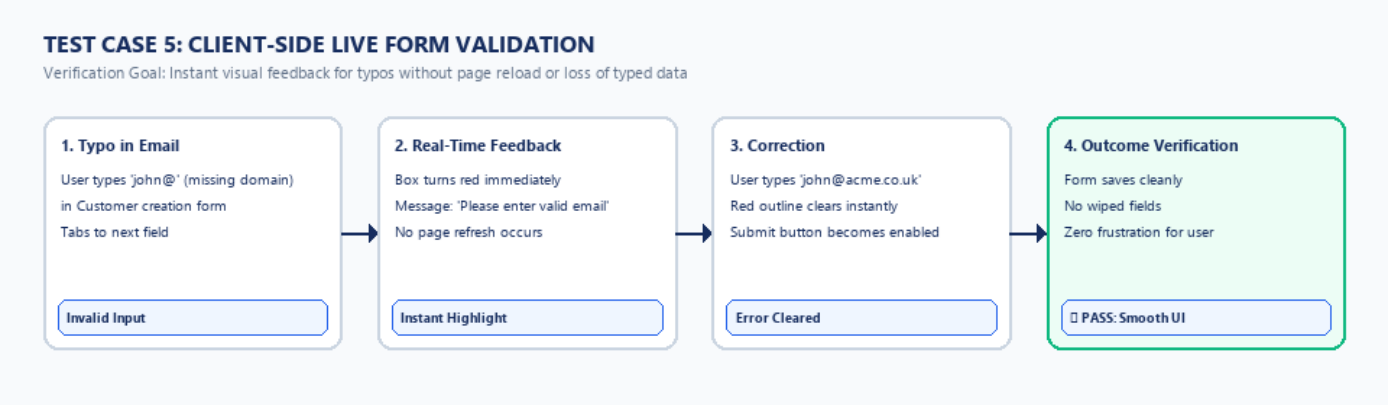

Test Case 3: The 'Never Unbalanced' General Ledger Shield

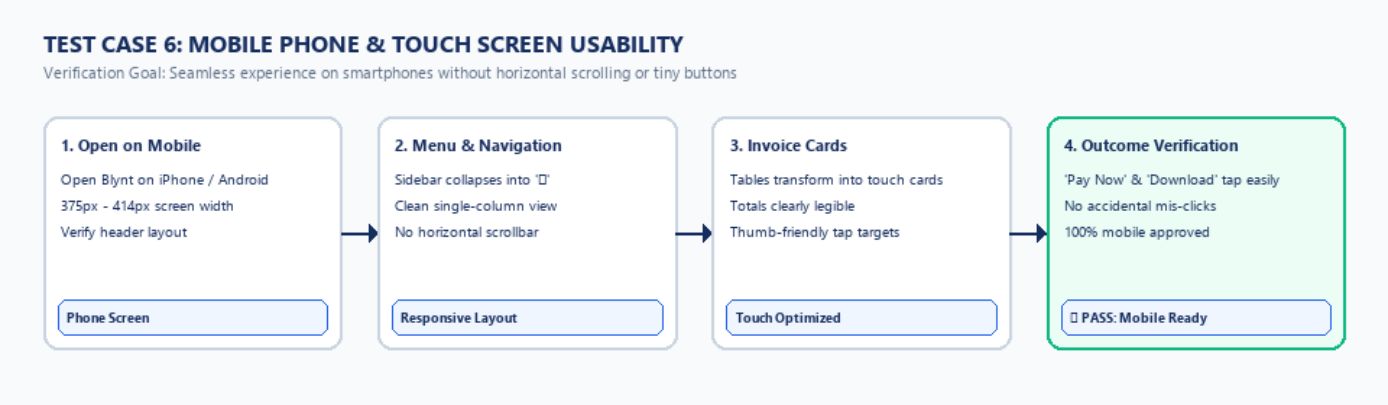

Test Case 4: Closed Tax Period Backdating Prevention

Test Case 5: Client-Side Instant Form Error Feedback

Test Case 6: Mobile Phone Screen & Touch Usability

4. Non-IT User Acceptance Sign-Off Table
